Order Instituting Rulemaking to Examine
Electric Utility De Energization of Power
Lines in Dangerous Conditions.

R.18-12-005
(Filed December 13, 2018)

**SAN DIEGO GAS & ELECTRIC COMPANY (U 902-E)
PUBLIC SAFETY POWER SHUTOFF POST-EVENT GROUP REPORT
FOR NOVEMBER 24 – NOVEMBER 26, 2021**

In compliance with California Public Utilities Commission Public Safety Power Shutoff (PSPS) Order Instituting Rulemaking Phase 1 Decision (D.) 19-05-042, Phase 2 D.20-05-051, Phase 3 D.21-06-034 and PSPS Order Instituting Investigation D.21-06-014, San Diego Gas & Electric Company (SDG&E) hereby submits this report (Attachment A hereto) regarding the Public Safety Power Shutoff (PSPS) event that occurred in SDG&E's service territory on November 24, 2021 – November 26, 2021. In accordance with D.19-05-042 and D.21-06-014, this report is being distributed to the service lists for the following Commission rulemaking proceedings: R.18-10-007 and R.18-12-005 as well as all lead affected local and county public safety partners.

Pursuant to the October 14, 2021 email ruling of ALJ Valerie Kao, SDG&E hereby provides the following link to access and download the attachments (geodatabase files and Excel workbook) to its PSPS Post-Event Report: <https://www.sdge.com/wildfire-safety/psps-more-info>.

Respectfully submitted,

**Re: SDG&E Public Safety Power Shutoff Post-Event Report for November 24 –
November 26**

Dear Director Palmer:

Pursuant to Ordering Paragraph (OP) 2 of Commission Decision (D.) 12-04-024, Section II.A of Commission Resolution ESRB-8, D.19-05-042, D.20-05-051, D.21-06-014 and D.21-06-034, San Diego Gas & Electric Company (SDG&E) submits this report regarding the Public Safety Power Shutoff (PSPS) event that occurred in SDG&E’s service territory on November 24, 2021 – November 26, 2021. As noted in the PSPS reporting requirements, this report has been verified by an SDG&E officer in accordance with Rule 1.11 of the Commission’s Rules of Practice and Procedure.

If you have any questions regarding this report, please contact Shewit Woldegiorgis at swoldegiorgis@sdge.com.

Sincerely,

/s/ Clay Faber

Section 1 – Executive Summary

1. Brief description of the PSPS event starting from the time when the utility’s Emergency Operation Center is activated until service to all customers have been restored.

The November 24th-26th Santa Ana event transpired from a cutoff low system which approached the coast of Southern California during the beginning of that week. Forecast model guidance during the prior week indicated that as the system moved eastward across the SDG&E service territory, the cutoff low would merge with another weather system (trough), leading to an area of high northeasterly winds aloft over San Diego County. Given that a very dry airmass (with single digit relative humidity values) was in place in conjunction with anticipated winds across the higher terrain, a PSPS Watch was issued on Monday (11/22) and was upgraded to a PSPS Warning on Tuesday (11/23).

The National Weather Service issued a Red Flag Warning for: San Diego County Mountains and Valleys (Zone 250 & 258) from Thursday 4 AM to Friday 6 PM, Inland Orange County (Zone 554) from Wednesday 10 AM to Friday 6 PM, Coastal Orange County (Zone 552) from Wednesday 6 PM to Thursday 3 PM. The Santa Ana Wildfire Threat Index (SAWTI) was listed as ‘Moderate’ for Thursday and ‘Marginal’ for Wednesday (11/23) and Friday (11/26). The Fire Potential Index (FPI) was ‘Elevated’ for all districts starting on Thanksgiving Day (11/25) through Saturday (11/27).

On Monday, (11/22) SDG&E activated the Notification Group to initiate public safety partner notifications. Notifications continued Tuesday (11/23) through EOC activation.

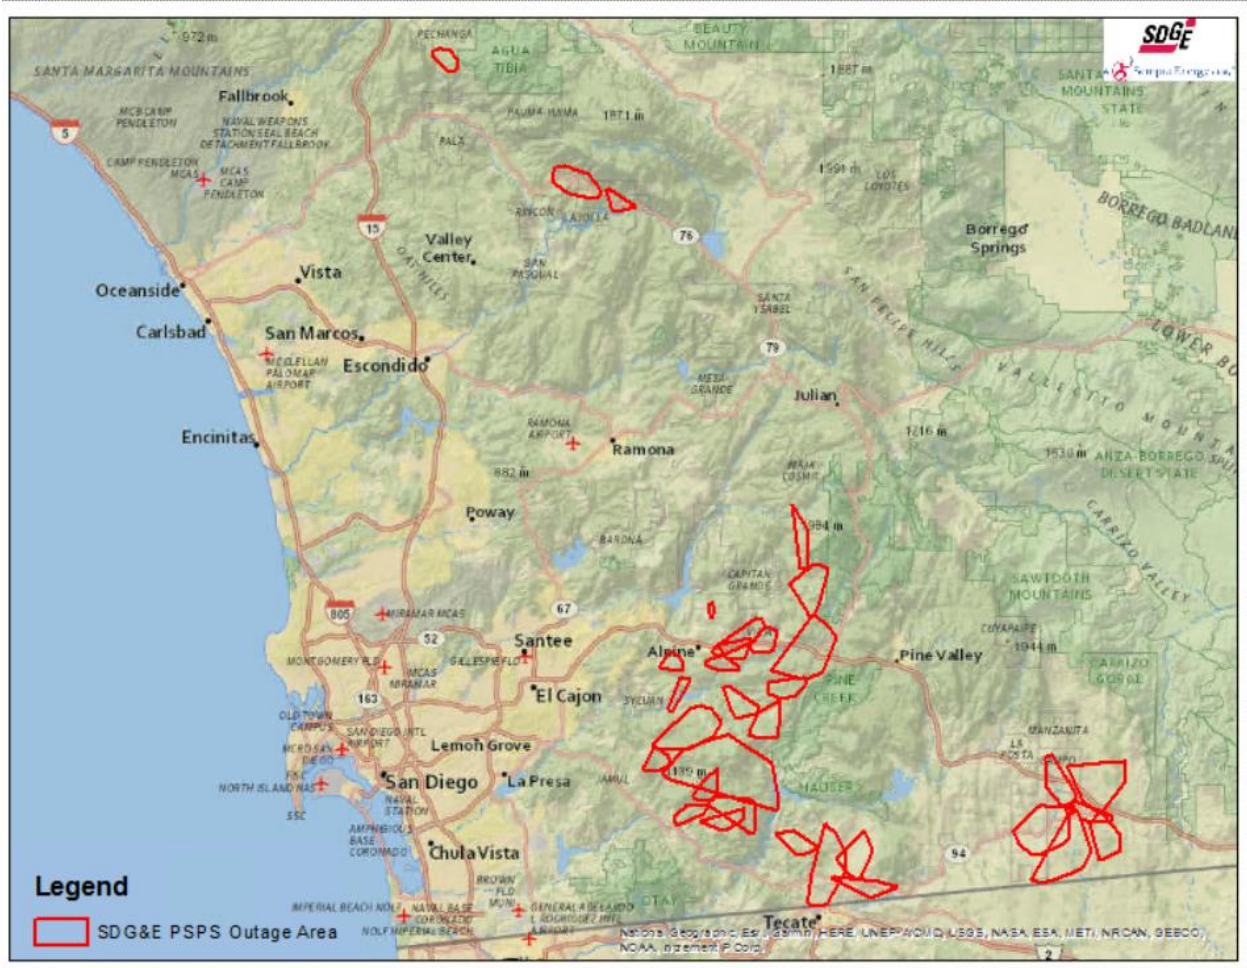

The PSPS and EOC activation began Wednesday evening at 6 PM (11/24) and lasted until all service to customers was restored late Friday afternoon (11/26 4:37 PM). SDG&E deactivated its EOC on Friday afternoon at 4:53 PM (11/26). Maximum wind gusts were forecast to range between 30-45 mph with locally higher gusts in the most wind-prone locations. The peak winds occurred during the pre-dawn hours of Thanksgiving Day with a gradual diminishment during the morning hours on 11/26.

2. A table including the maximum numbers of customers notified and actually de-energized; number of counties de-energized; number of tribes de-energized; number of Medical Baseline customers de-energized; number of transmission and distribution circuits de-energized; damage/hazard count; number of critical facilities and infrastructure de-energized. Hazards are conditions discovered during restoration patrolling or operations that might have caused damages or posed an electrical arcing or ignition risk had PSPS not been executed.

Table 1: PSPS Event Summary

Total Customers			De-energized				Number of Circuits			Damage/ Hazard Count
PSPS Notified	De- energized	Cancelled	MBL Customers	Number of Counties	Number of Tribes	Critical Facilities and Infrastructure	Transmission De-energized	Distribution Circuits in Scope	Distribution Circuits De- energized	
54,527	5,858	48,669	47	1	5	241	0	79	13	0

3. A PDF map depicting the de-energized area(s)

Section 2 – Decision-Making Process

- 1. A table showing all factors considered in the decision to shut off power for each circuit de-energized, including sustained and gust wind speeds, temperature, humidity, and moisture in the vicinity of the de-energized circuits**

An abbreviated table showing the major factors considered in the decision to shut off power for each circuit de-energized is provided in Table 2. The full table is included in Appendix 5.

Table 2: Factors Considered in the Decision to Shut Off Power

Circuit/ Device Name	Sustained Wind Speeds (mph)	Gust Wind Speeds (mph)	Peak Wind Speed (mph)	Fire Potential Index ¹ (FPI)	Vegetation Risk Index ¹ (VRI)	Circuit Risk Index ¹ (CRI)	Alert Speed ² (mph)	WiNGS Ops ^{2,3} (mph)	Wildfire/ PSPS Ratio ⁴	Temp Config (Y/N)
79-799R	29	45	68	14	L	L	45	NA	11875	N

* Device was de-energized due to on-site observation of vegetation damage, conductor movement, and flying debris.

¹ VRI and CRI provide a relative assessment of vegetation as well as conductor risk for each segment. Methodologies reported in SDG&E's 2021 WMP, Section 4.5.1.

² Calculations described in Section 2.2 and 2.4 of this report.

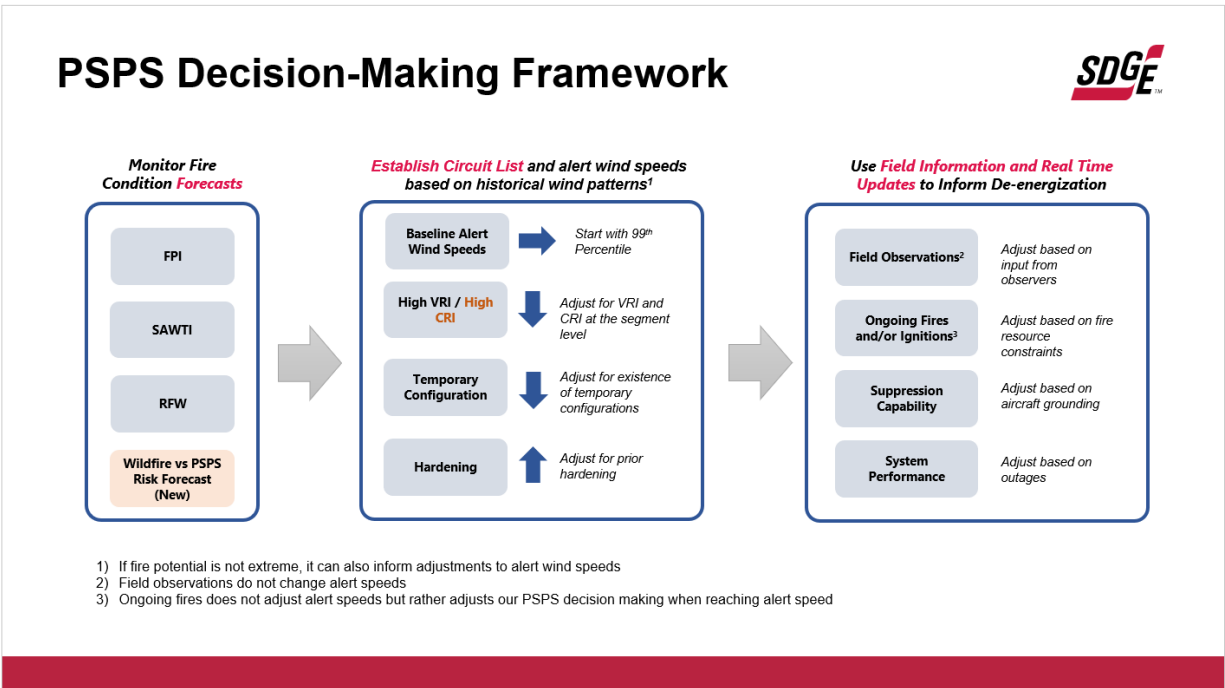

³ WiNGS Ops provides an estimated wind speed at which the total fire risk exceeds PSPS risk. This output incorporates both an estimate of likelihood of the risk as well as consequence. This model is in its early stages of implementation. NA indicates where models show extreme values that would not occur during operation and should therefore be disregarded.

⁴ This ratio depicts the comparison between wildfire consequence score using historical weather events and PSPS consequence score (excludes likelihood of risk). A value greater than 1 means the wildfire consequence exceeds the PSPS consequence.

2. Decision criteria and detailed thresholds leading to de-energization including the latest forecasted weather parameters versus actual weather. Also include a PSPS decision-making diagram(s)/flowchart(s) or equivalent along with narrative description

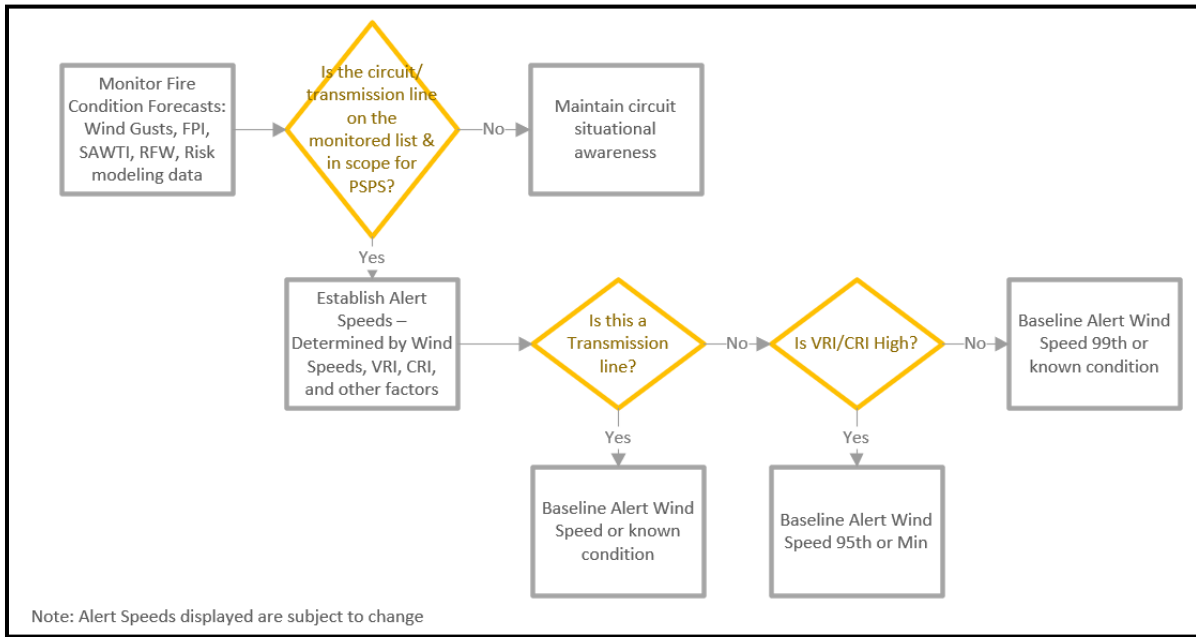

SDG&E utilizes multiple factors outside of weather to assist in the decision making. Some of those factors pertain to information in the field based on known compliance issues on the electrical system, active temporary construction/configuration of the electrical system and a circuit risk index to identify locations in the system with a potential of having higher failure rates. These factors are compiled and populated for each sectionalizing device to assist with developing alert speeds and increased awareness of risky assets on the electrical system.

Figure 1: PSPS Decision-Making Framework

Sectionalizing device alert speeds are determined separately for each device tied to a weather station and are based on a variety of factors, such as wind speeds, vegetation risk index and circuit risk index. Alert speed thresholds are lowered if Vegetation Risk Index (VRI) or Circuit Risk Index (CRI) is high, as seen in the figure below. Other factors such as maintenance issues, existing construction, other real time observations, ongoing fires and/or ignitions, suppression capabilities or system protection could lower the thresholds for specific events.

Figure 2: Alert Speed Calculation

SDG&E’s Fire Science and Climate Adaptation team closely monitored weather forecasts in advance of the approaching Santa Ana wind event and presented the latest forecast and fire potential information to the SDG&E Officer in Charge, who made the decision to initiate PSPS protocols on Monday, November 22nd for a potential PSPS event on Thursday, November 25th. The factors considered when initiating the PSPS event with 72 hours’ notice included:

Fire Potential Index (FPI): The FPI issued Monday morning, November 22nd at 6am increased the rating to “14” for Thanksgiving Day. The increased rating was in part due to a combination of strong gusty winds and dry fuels that were expected across the region. A rating of “14” is an indication that there could be large and damaging fires, should an ignition occur. The FPI rating maintained its rating of 14 through the event and this served as a factor when determining PSPS. The table below illustrates the seven-day FPI forecast issued on Monday morning, November 22nd.

Figure 3: Seven Day FPI Outlook

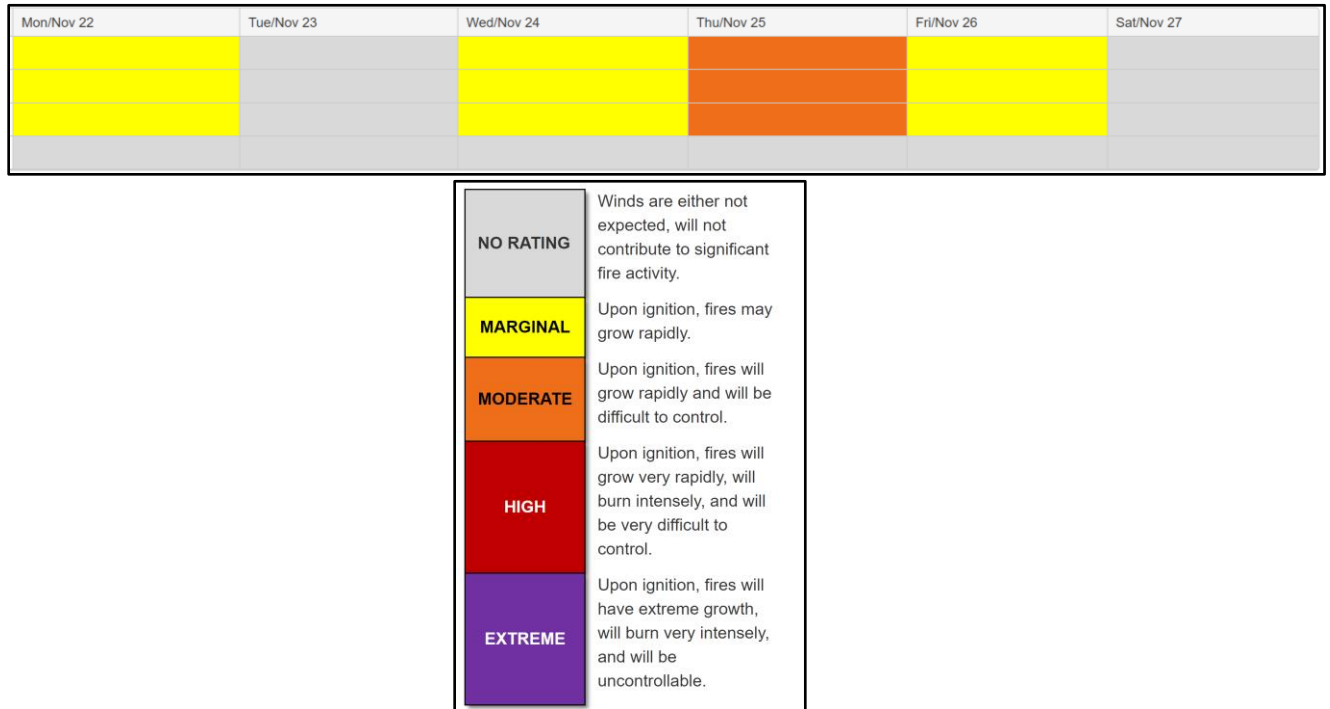

Seven Day FPI Outlook:

	Mon 11/22	Tue 11/23	Wed 11/24	Thu 11/25	Fri 11/26	Sat 11/27	Sun 11/28
ME	Elevated 12	Elevated 12	Elevated 13	Elevated 14	Elevated 13	Elevated 12	Elevated 12
RA	Elevated 12	Elevated 12	Elevated 13	Elevated 14	Elevated 13	Elevated 12	Elevated 12

NC	Normal 11	Normal 10	Normal 11	Elevated 12	Elevated 12	Elevated 12	Normal 11
BC	Normal 11	Normal 10	Normal 11	Elevated 12	Elevated 12	Elevated 12	Normal 11
CM	Normal 11	Normal 10	Normal 11	Elevated 12	Elevated 12	Elevated 12	Normal 11

SDG&E Weather Forecast: A detailed, AI driven weather forecast was generating forecast by Monday morning that were consistent with what our meteorology team was forecasting, which was gusts 40-60 mph across the backcountry of San Diego with locally higher gusts. These weather forecast remain available at the San Diego Supercomputing Center at the following link: https://sdge.sdsc.edu/data/sdge/gust_forecast/

Santa Ana Wildfire Threat Index (SAWTI): The SAWTI that was issued on Monday morning from the Predictive Services unit from the Forest Service was indicating that there was a Moderate rating for San Diego on Wednesday, meaning that “upon ignitions, fires will grow rapidly and will be difficult to control”. Additionally, this Predictive Services unit also designated Thursday as a “High Risk” day for large fires across southern California.

Figure 4: SAWTI

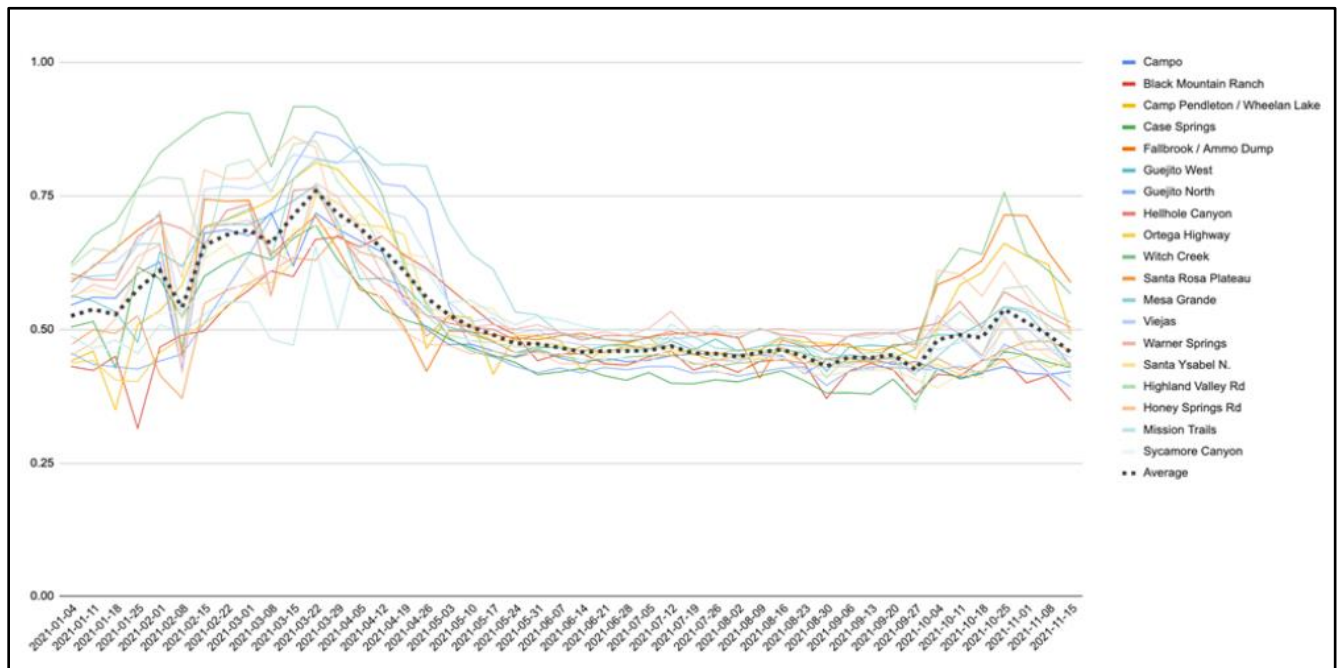

National Weather Service (NWS) Forecast: The NWS was forecasting the potential for Santa Ana winds in their forecast close to a week in advance, though it was late in the weekend (~11/21) when it became apparent that the potential for rainfall in the days ahead of Thanksgiving was looking less likely, and the potential for critical fire danger started to be mentioned by the NWS. This eventually led to an issuance of a Fire Weather Watch and Red Flag Warning as the event approached. There was also a designation of Critical Fire Weather from the NWS Storm Prediction Center.

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

factors considered in the FPI determining the fire environment was critically dry are further discussed below.

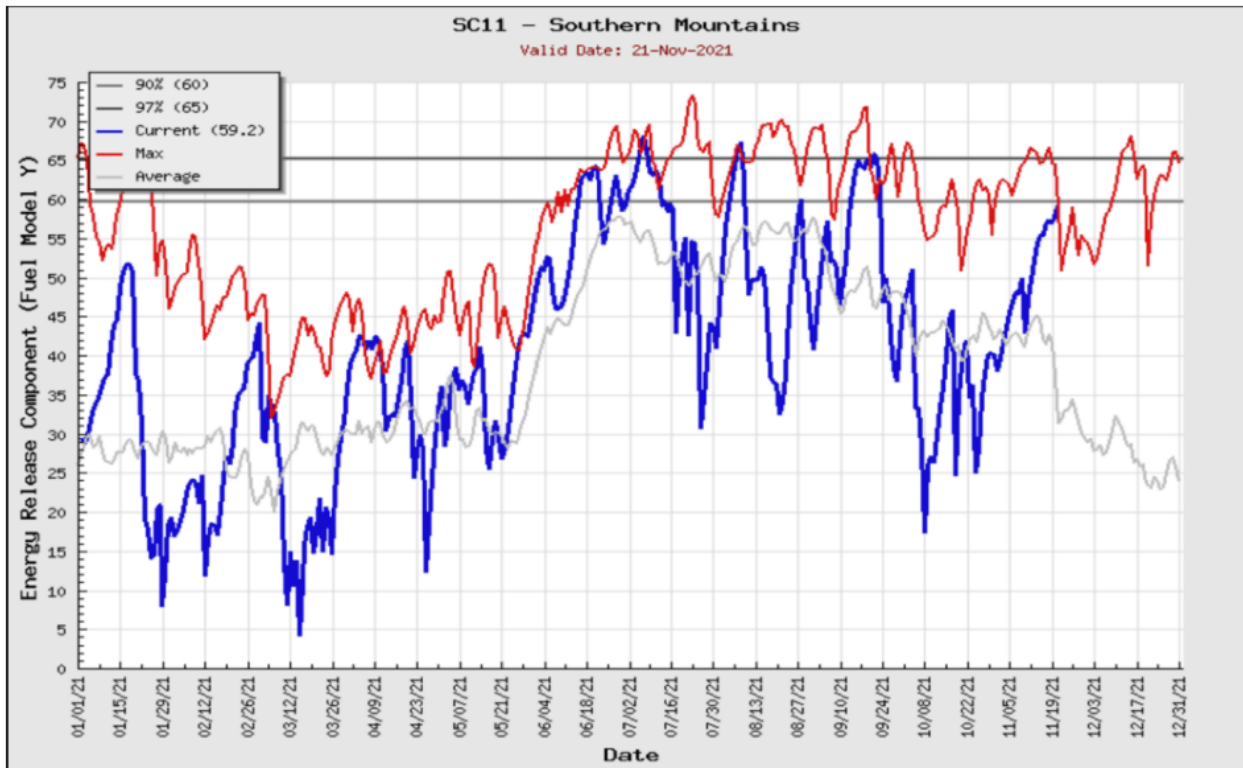

SDG&E leverages satellite data to closely monitor the greenness of the grass across its service territory. As demonstrated in the graph below, following early season rainfall and some greening of the annual grasses, satellites were confirming visual observations that there had been a decline in greenness of the annual grasses, increasing wildfire potential.

Figure 6: Normalized Difference Vegetation Index (NDVI) measured weekly from low earth orbiting satellites at a resolution of 3.7m for 20 grassland areas in San Diego County

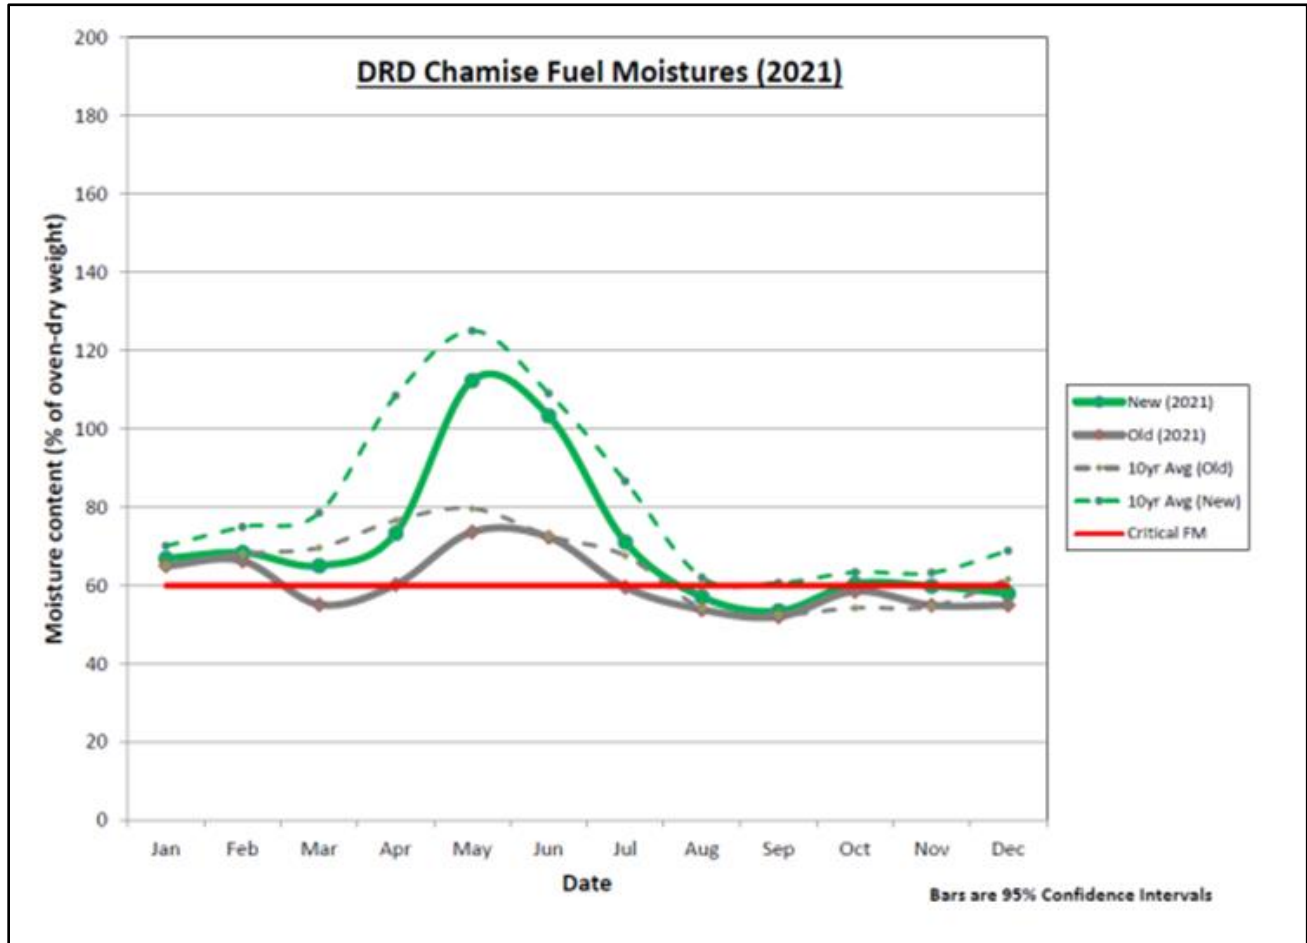

In addition to the drying of the annual grasses, SDG&E has also been measuring and observing a significant drying of the dead fuel moistures across the region this year. This drying of the dead fuels is demonstrated in the graph below of Energy Release Component (ERC), which is an indicator of the intensity by which a wildfire could burn. As noted in the graph below, due to recent hot and dry weather, the ERCs across our region were reaching near record levels for that date, further supporting the potential for a large and destructive wildfire, should an ignition occur.

Figure 7: Dead Fuel Moistures

Live Fuel Moisture is also closely monitored, measured and analyzed when considering PSPS. The graph below demonstrates the Live Fuel Moisture reading that was incorporated in the Fire Potential Index. As shown, Live Fuel Moisture, which is an indication of the moisture content of the living vegetation was below average and below critical levels, further exacerbating the wildfire risk.

Figure 8: Live Fuel Moistures

Over the past year, SDG&E has developed more granular modeling of the probability of ignition and probability of failure at the asset and ignition source level. During this PSPS event, SDG&E incorporated the new real time risk assessment model called the Wildfire Next Generation System – Operations model (WiNGS-Ops) to evaluate and compare Wildfire and PSPS risks at the asset level (pole/span), as well as at the sub-circuit/segment level. Since this is a new model, the output of WiNGS-Ops was used as an additional data point to help inform the decision makers, but it was not fully embedded in the PSPS decision making. The model takes into account the probability of failure, probability of ignition and the consequence of a risk event at each pole and span location, as a function of wind. SDG&E plans to continue to evaluate and enhance WiNGS-Ops with development of more granular machine learning probability of failure, probability of ignition, consequence models for different assets and failure modes and continue to enhance PSPS models.

This information above was coupled with a forecast of strong and potentially damaging winds to determine that the conditions could become unsafe, which led to the initiation of the PSPS event. As the weather event began, wind gusts were monitored closely in real-time. As discussed in section 5 below, PSPS was considered and, in certain instances implemented, in real-time once alert speeds were reached. In sum, SDG&E’s analytical tools and operational experience supported initiation of PSPS events at certain locations as a measure of last resort to avoid the risk of catastrophic wildfires.

- 4. An explanation of how the utility determined that the benefit of de-energization outweighed potential public safety risks, and analysis of the risks of de-energization against not de-energizing. The utility must identify and quantify customer, resident, and the general public risks and harms from de-energization and clearly explain risk models, risk assessment processes, and provide further documentation on how the power disruptions to customers, residents, and the general public is weighed against the benefits of a proactive de-energization.**

To determine whether the benefit of de-energization (PSPS) outweighed the potential public safety risks, SDG&E modeled the opposing scenarios in accordance with the risk quantification framework reported in the 2021 RAMP filing, which uses a multi-attribute value function (MAVF) to quantify risk. Based on probabilistic modeling and a set of assumptions, SDG&E identified wind speeds for which de-energization would likely produce a favorable outcome to customers and the public. This analysis was performed for each segment with the potential for PSPS and reported in Table 2 for segments that were ultimately de-energized during this event. In the days leading up to the event, SDG&E used wind forecasts to identify high-risk segments to carefully monitor.

The risk quantifications consider the *expected value* of the risks for each scenario and segment. For the non-PSPS scenario, this is the probability of ignition from the assets on the segment multiplied by the quantified consequence of that wildfire. For the PSPS scenario, it is only the quantified risk of de-energization, since the event has a one hundred percent probability when it is initialized by SDG&E. In the iteration of the models used for this event, only the probability of ignition varies with wind gust.

To quantify the consequence of PSPS and wildfire, SDG&E used models to estimate the top-level attributes that comprise the MAVF: safety, reliability, financial, and stakeholder satisfaction. The models for PSPS consequence are simplistic but require some considerable assumptions described in the tables below. For wildfire consequence, SDG&E used the fire spread models developed by Technosylva, Inc, which was described in SDG&E's 2021 WMP filing. The Technosylva models output fire consequence in units not directly relatable to the MAVF core attributes, such as structures impacted, population impacted, and acres burned. Therefore, an additional layer of assumptions is required to “convert” the Technosylva model outputs to MAVF values. The calculation methodologies are reported in the Figure 9. The resulting wildfire consequence values for each device that was de-energized is shown in Table 2.

Figure 9: Multi-attribute Value Function Calculation Methodologies

Attribute	PSPS Event	Wildfire Event
Safety	number of affected customers × PSPS duration × SIF per customer-minutes	structures impacted × SIF per structure impacted + population impacted × smoke fatality fraction + affected customers* × pole restoration duration × SIF per customer-minutes
Reliability	SAIDI + SAIFI (based on PSPS duration)	SAIDI + SAIFI (based on pole restoration duration)
Financial	number of affected customers × dollars per affected customer	structures impacted × dollars per structure + acres impacted × dollars per acre + acres impacted × suppression dollars per acre + affected customers × dollars per affected customer
Stakeholder Satisfaction	fraction of affected customers to potentially affected customers	1

*Affected customers for wildfire must be estimated from the number of customers downstream of impacted assets

The assumptions used for this event are undergoing careful consideration, research, and review. These values provide only initial guidelines and will be further refined to more accurately compare the risks of PSPS and wildfire. For this event, the assumptions in Figure 10 were.

Figure 10: Assumptions Used

PSPS duration (pre-event assumed)	32 hours
Pole restoration duration	15 hours
SIF per customer-minutes	10B
SIF per structure impacted	0.0225
Smoke fatality fraction	0.125%
Dollars per affected customer	\$250
Dollars per structure	\$1.32M
Dollars per acre	\$1175
Suppression dollars per acre	\$591

In addition to the uncertainty of the model assumptions, the model methodologies themselves are continually improving. The models used for this event were first introduced this year, and therefore may be missing some key factors driving the decision to de-energize. Therefore, some discretion is necessary when weighing these model outputs against other observations.

Future iterations of these models are expected to prove more accurate, reliable, and all-encompassing. For this event, some reasons for de-energizing at wind speeds differing from the model outputs are:

- Non-standard, temporary configuration
- Shorter PSPS duration
- Longer decision interval (not hourly)
- Updated ground information
- Low customer count
- Weather station proximity

5. Explanation of alternatives considered and evaluation of each alternative.

Prior to and during the event, SDG&E considered alternatives to PSPS by considering various factors. These included weather information to understand the scope of the PSPS event, initiating patrols prior to event to understand the field conditions and the grid conditions, assessing temporary construction configurations and asset management inspection conditions, reviewing the vegetation risk index data, reviewing the conductor risk data, and monitoring 30 second weather station reads to ensure wind alert speeds would indeed pose enough of a wildfire risk prior to triggering PSPS. Additionally, SDG&E looks for opportunities to cutover segments of circuits which may be less impacted by the forecasted weather to other circuits if the feed to these segments is from a circuit that may be affected by PSPS.

- **Weather analysis prior to the PSPS event.** As described above, weather related information (enhanced with AI forecasting) informs SDG&E’s PSPS operations, providing a better understanding of the potential scope of circuit segments impacted. Utilizing the weather forecast, SDG&E further narrows the list of forecasted circuit segments as the event gets closer.
- **Patrols prior to the event.** Patrols conducted prior to the event inform the PSPS decision-making process. If any unmitigable conditions are found during the patrols, it could potentially lead to PSPS. Patrols also provide an alternative to PSPS and keep the power on for areas found to be clear as long as no other conditions point to a wildfire risk.
- **Temporary configurations and asset conditions.** Prior to an event, an assessment of any ongoing construction and temporary conditions of the grid are identified to factor these known conditions into a decision for PSPS. The Corrective Maintenance Program (CMP) is also leveraged to understand any outstanding maintenance conditions of grid assets.
- **Circuit Risk Index (CRI).** CRI is probabilistic model that evaluates the risk of wind-driven conductor failure and ignition on a given segment. For example, segments with more small copper wires are flagged as higher risk than other segments that have thicker newer wire installed via hardening programs. SDG&E uses this information to determine whether a circuit segment has small wire associated with high failure rate under high wind conditions, which plays a part in determining the level of wildfire risk.
- **30 second weather station reads during the event.** The 30 second reads from weather stations provide the wind gusts and duration associated with each weather station. This read informs SDG&E as to how close the wind speeds are to the alert

speeds for which PSPS consideration may be triggered. Many circuit segments were not de-energized based on the 30 second read information.

During the post event analysis of this event, SDG&E determined that there were 58 sectionalizing devices identified in which the wind speeds met the pre-determined alert speed prior to the event, but real-time considerations during the event supported decisions to not initiate a PSPS for these devices. Approximately 25,000 customers were located in these areas where a PSPS was avoided. Some considerations that were included in keeping customers energized included:

- 30-second weather reading indicated that strong wind gusts were short lived and not persistent.
- The Fire Potential Index was indicating that conditions were not “Extreme” in the area, including SME input on rainfall earlier in the season.
- SMEs were advising that wind speeds were near peak and not expected to rise further.
- Winds were occurring in areas prone to strong winds.
- The electric system was performing well and faults were not observed in the area of the higher winds.
- There was minimal wildfire activity being reported across the region.

Section 3 – De-energized Time, Place, Duration and Customers

1. The summary of time, place and duration of the event, broken down by phase if applicable.

The PSPS event began on 11/24/21 at 11:47 and concluded 11/26/21 at 16:37 with a total duration of 52 hours and 50 minutes. The event was located in portions of San Diego County. During the event, the majority of patrol and restoration activities occurred on 11/26/21, but some limited patrols and restorations occurred on 11/25/21, as conditions warranted.

2. A zipped geodatabase file that includes PSPS event polygons of de-energized areas. The file should include items that are required in Section 3.3.

A zipped geodatabase file that includes all information in Section 3.3 is included with this filing as Appendix 6 and can also be accessed as: <https://www.sdge.com/wildfire-safety/psps-more-info>.

3. A list of circuits de-energized, with the following information for each circuit. This information should be provided in both a PDF and excel spreadsheet.

- **County**
- **De-energization date/time**
- **Restoration date/time**
- **“All Clear” declaration date/time**
- **General Order (GO) 95, Rule 21.2-D Zone 1, Tier 2, or Tier 3 classification or nonHigh Fire Threat District**
- **Total customers de-energized**
- **Residential customers de-energized**

- **Commercial/Industrial customers de-energized**
- **Medical Baseline (MBL) customers de-energized**
- **AFN other than MBL customers de-energized**
- **Other Customers**
- **Distribution or transmission classification**

The list of circuits de-energized with the required information is included in Appendix 5 as Table 3. The field “AFN other than MBL Customers” includes all customers that meet any of the 12 AFN conditions flagged in SDG&E’s customer information system as long as MBL is not the only condition. However, there are 144 instances where the customer has MBL flagged in addition to any of the other 11 AFN conditions.

Section 4 – Damage and Hazards to Overhead Facilities

1. Description of all found wind-related damages or hazards to the utility’s overhead facilities in the areas where power is shut off.

No wind-related damages or hazards to SDG&E overhead facilities were found in the areas where power was shut off.

2. A table showing circuit name and structure identifier (if applicable) for each damage or hazard, County that each damage or hazard is located in, whether the damage or hazard is in a High Fire-Threat District (HFTD) or non-HFTD, Type of damage/hazard of damage.

No wind-related damages or hazards to SDG&E overhead facilities were found in the areas where power was shut off.

3. A zipped geodatabase file that includes the PSPS event damage and hazard points. The file should include fields that are in the table in section 4.2 above.

No wind-related damages or hazards to SDG&E overhead facilities were found in the areas where power was shut off.

4. A PDF map identifying the location of each damage or hazard.

No wind-related damages or hazards to SDG&E overhead facilities were found in the areas where power was shut off.

Section 5 – Notifications

1. A description of the notice to public safety partners, local/tribal governments, paratransit agencies that may serve all the known transit- or paratransit-dependent persons that may need access to a community resource center, multi-family building account holders/building managers in the AFN community, and all customers, including the means by which utilities provide notice to customers of the

locations/hours/services available for CRCs, and where to access electricity during the hours the CRC is closed.

Appendix 1 includes a description of notifications to customers advising of CRC information. Additionally, customer notifications and ongoing communications refer customers to the SDG&E PSPS webpage (sdge.com/ready) for real-time information related to CRCs.

See Appendix 2 for a description of notifications to Public Safety Partners.

See Appendix 3 for a description of notifications to the CPUC.

See Appendix 4 for a description of notifications to AFN Community Based Organizations. For the purpose of this report, AFN Community Based Organizations (CBO's) provide direct services to customers under the SDG&E AFN support model, including 211, paratransit, temporary hotel stays, emergency generators, County medical and social agencies, food support agencies and non-profit networks, CBO's that have influence and directly or indirectly serve AFN communities within the SDG&E service territory and master metered residential property and mobile home park managers.

2. Notification timeline including prior to de-energization, initiation, restoration and cancellation, if applicable. The timeline should include the required minimum timeline and approximate time notifications were sent.

See Appendix 1 for the timeline pertaining to customer notifications.

See Appendix 2 for a timeline of all notifications to Public Safety Partners.

See Appendix 3 for a timeline of all notifications to the CPUC.

See Appendix 4 for timeline of all notifications to AFN Community Based Organizations.

3. For those customers where positive or affirmative notification was attempted, use the following template to report the accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved. "Notification attempts made" and "Successful positive notification" must include the unique number of customer counts. When the actual notification attempts made is less than the number of customers that need positive notifications, the utilities must explain the reason. In addition, the utilities must explain the reason of any unsuccessful positive notifications.

Table 4: Positive Notification

Designation	Total Number of Customers	Notification Attempts Made	Timing of Attempts	Who made the Notification Attempt	Successful Positive Notification
AFN	1,082	1,082	11/23/2021- 11/24/2021	SDG&E	1,082
MBL	47	47	11/23/2021- 11/24/2021	SDG&E	47

4. A copy or scripts of all notifications with a list of all languages that each type of notification was provided in, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).

Scripts of all customer notifications are included in Appendix 1. SDG&E performs all primary customer notifications and encourages public safety and community partners to amplify PSPS messages on their platforms as appropriate. SDG&E offers all notifications in the following languages: English, Spanish, Tagalog, Cantonese, Mandarin, Vietnamese, Arabic, Korean, Russian, French, German, Farsi, Japanese, Punjabi, Khmer, Somali, Mixteco, Zapoteco, Armenian, Hindi, Portuguese, and Thai. Additionally, SDG&E provides customer notifications in American Sign Language and corresponding read-outs.

See Appendix 2 for copies of all notifications to Public Safety Partners.

See Appendix 3 for copies of all notifications to the CPUC.

See Appendix 4 for copies of all notifications to AFN Community Based Organizations.

5. If the utility fails to provide notifications according to the minimum timelines set forth in D.19-05-042 and D.21-06-034, using the following template to report a breakdown of the notification failure and an explanation of what caused the failure.

Table 5: Notification Failure

Notifications Sent to	Notification Failure Description	Number of Entities or Customer Accounts	Explanation
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48- to 72-hour advance notification.	0	While multiple partners at all of the required entities received the appropriate notifications, there were 22 contacts within 10 different entities that did not receive the 72 & 48 notifications. We have multiple contacts per entity to ensure redundancy of notifications. The issue with the 22 contacts was a database coding issue: they were not assigned in the database to a notification group category. Immediately

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

			after the 48-hour notification was issued we were made aware of the situation and corrected all 22 contact records in the database so they received all subsequent notifications.
	Entities who did not receive 1–4-hour imminent notification.	0	N/A
	Entities who did not receive any notifications before de-energization.	0	N/A
	Entities who were not notified immediately before re-energization	0	N/A
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72 hour advance notification.	3	1 customer did not have contact information in notification system. 2 customers were not notified due to system error.
	Facilities who did not receive 1-4 hour of imminent notifications.	75	1 customer did not have contact information in notification system. 74 customers were not notified due to system error. Note: Customers de-energized overnight received overnight message.
	Facilities who did not receive any notifications before de-energization.	3	1 customer did not have contact information in notification system. 2 customers were not notified due to system error.
	Facilities who were not notified at de-energization initiation.	35	1 customer did not have contact information in notification system. 34 customers were not notified due to system error.
	Facilities who were not notified immediately before re-energization.	86	1 customer did not have contact information in notification system. 85 customers were not notified due to system error.
	Facilities who were not notified when re-energization is complete.	73	1 customer did not have contact information in notification system. 72 customers were not notified due to system error.
	Facilities who did not receive cancellation notification within two hours of the decision to cancel	5	1 customer did not have contact information in notification system. 4 customers were not notified due

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

			to system error.
All other affected customers	Customers who did not receive 24–48-hour advanced notifications.	231	38 customers did not have contact information in notification system. 193 customers were not notified due to system error.
	Customers who did not receive 1–4-hour imminent notifications.	1,043	38 customers did not have contact information in notification system. 1,005 customers were not notified due to system error. Note: Customers de-energized overnight received an overnight message.
	Customers who did not receive any notifications before de-energization.	215	38 customers did not have contact information in notification system. 177 customers were not notified due to system error.
	Customers who were not notified at de-energization initiation.	884	38 customers did not have contact information in notification system. 846 customers were not notified due to system error.
	Customers who were not notified immediately before re-energization.	672	38 customers did not have contact information in notification system. 634 customers were not notified due to system error.
	Customers who were not notified when re-energization is complete.	1,406	38 customers did not have contact information in notification system. 1,368 customers were not notified due to system error.
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	2,503	38 customers did not have contact information in notification system. 2,465 customers were not notified due to system error.

6. Explain how the utility will correct the notification failures.

A system error was identified during the event causing 6,961 customer notifications to be blocked at the carrier level. An incident was created with the communications vendor to resolve the issue. For the customers who do not have contact information (home phone, mobile, and email), SDG&E will reach out with direct communication in the form of a letter to the mailing address on file.

7. Enumerate and explain the cause of any false communications citing the sources of changing data.

No false communications were sent during this event.

Section 6 – Local and State Public Safety Partner Engagement

- 1. Use the following table to List the organization names of public safety partners including, but not limited to, local governments, tribal representatives, first responders and emergency management, and critical facilities and infrastructure the utility contacted prior to de-energization, the date and time on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in CPUC General Order 95, Rule 21.2-D.**

The list public safety partners contacted prior to de-energization is included in Appendix 5 as Table 6.

- 2. List the names of all entities invited to the utility’s Emergency Operations Center for a PSPS event, the method used to make this invitation, and whether a different form of communication was preferred by any entity invited to the utility’s emergency operation center.**

SDG&E has a standing, open invitation to CalOES and the CPUC to embed a liaison in our virtual EOC. In addition to the offer of a liaison, SDG&E hosts a daily State Executive briefing. Leading up to the PSPS season, SDG&E met with our public safety partners to determine the best method of communication and providing situational awareness during EOC activations. The result of the meetings was to host a daily agency coordination call. SDG&E did not host daily agency coordination calls with public safety partners and critical infrastructure providers for this event. Instead these groups were proactively informed through different forms of communication. Impacted public safety partners were directed to the SDG&E Public Safety Partner Portal to receive the latest situational updates. Impacted critical facility and infrastructure customers were communicated to directly by their SDG&E account executive via phone and/or email communication. These impacted critical facility and infrastructure customers were provided a list of their potentially impacted meters and situational updates.

- 3. A statement verifying the availability to public safety partners of accurate and timely geospatial information, and real time updates to the GIS shapefiles in preparation for an imminent PSPS event and during a PSPS event**

SDG&E verifies that local and State Public Safety Partners receive accurate and timely potential GIS Public Safety Power Shutoff (PSPS) outage information through the ArcGIS Online system 48-72 hours before the SDG&E Emergency Operations Center (EOC) has been activated for a PSPS event. The partners that do not have access to the ArcGIS Online system receive GIS shapefiles through SDG&E’s Electronic Data Transfer (EDT) system.

- 4. A description and evaluation of engagement with local and state public safety partners in providing advanced outreach and notification during the PSPS event**

SDG&E updated the PSPS Public Safety Partner Portal and provided advanced notification for the following timeframes:

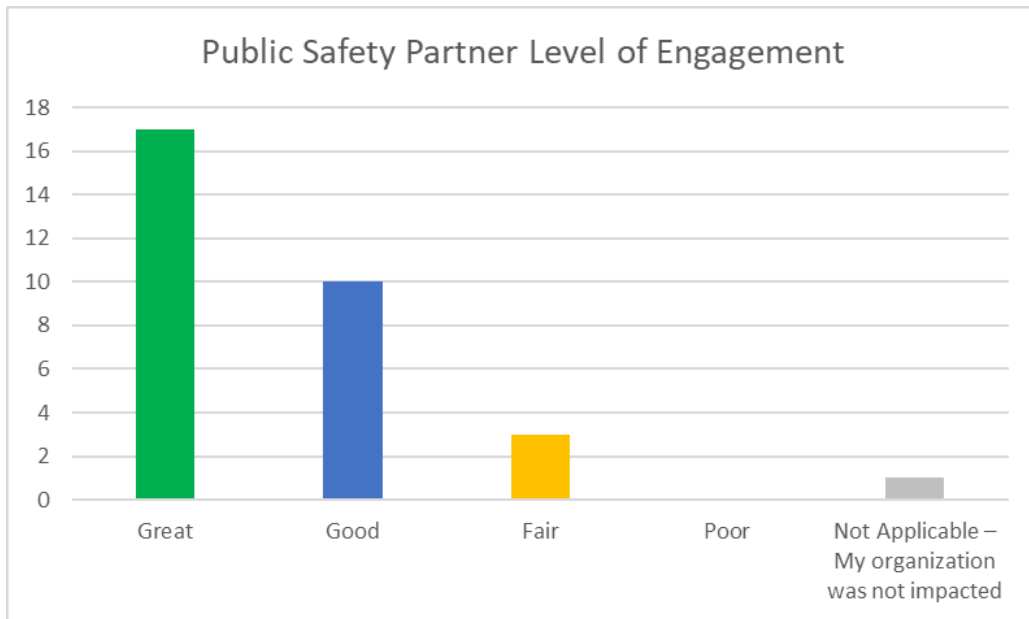

- 72 hours

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

- 48 hours
- 24 hours
- Time of EOC Activation

At the conclusion of an event SDG&E conducts an online survey for all public safety partners. The following graph represents the responses for the question of “Please evaluate SDG&E’s level of engagement with your organization before and during the most recent PSPS event.”

Figure 11: Public Safety Partner Level of Engagement

Some comments from the survey include:

“In my opinion as an Emergency Manager, I felt that this is the first time that I had actionable information from SDGE. I was able to provide the City Manager and Key department heads (i.e. PW, Fire, PD) with advance information. Thank you.”

“Great job! I was in the PSPS both personally and professionally, I felt you did a nice job in continually updating us with information.”

“Though I do not live or work in the recently impacted service areas, it may be helpful to share with the public the parameters for a PSPS for future events.”

5. Specific engagement with local communities regarding the notification and support provided to the AFN community

SDG&E’s Emergency Operations Center (EOC) AFN Liaison Unit provided 72, 48, 24 hour as well as de-energization, re-energization and Community Resource Center (CRC) notifications and information to AFN Service Partners throughout the event, similar to and directly following notifications made to Public Safety Partners. AFN Service Partners are

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

those Community Based Organizations’ that provide direct services to customers under the SDG&E AFN support model.

Daily brief notifications re-capping the PSPS activities, as well as the anticipated PSPS activities for the following day were provide to all ~725 SDG&E AFN partner contacts including the 48 AFN Service Partner contacts. All ~725 AFN Partner contacts were provided pertinent PSPS information as well as a social media kit to amplify PSPS messaging to their constituents.

SDG&E works closely with our AFN Service Partners to provide direct customer support during a PSPS. Services available to customers and non- account holders with an AFN during a PSPS include same day generator delivery, accessible hotel stays at no cost, accessible transportation to hotel, family or Community Resource Centers, preparedness items, warm meals, food support gift cards for assistance. PSPS support is coordinated through 211 San Diego and 211 Orange County with AFN Service Partners by contract. Any unmet needs are directed to the SDG&E Emergency Operations Center AFN Unit for resolution. 211 and the AFN Unit both have access to accessible communication tools and translators as needed.

The AFN Unit coordinated donation leftover meal items including meal boxes to the Filipino Veteran’s Village Association and pies to the San Diego Food Bank Super Pantry partners to help eliminate waste and further SDG&E’s sustainability efforts.

Table 7: Services Provides to Customers with AFN

Type of Service	Number Provided
Accessible Transportation Trips	4
Over Night Hotel Stays	11
Warm Meals Served at CRC/tribal support	1,550
Generator Requests	0
\$50 Gift Cards distributed	51

6. Provide the following information on backup power (including mobile backup power) with the name and email address of a utility contact for customers for each of the following topics:

- a. Description of the backup generators available for critical facility and infrastructure customers before and during the PSPS.**

Please see Table 8 in Section 6b below.

- b. The capacity and estimated maximum duration of operation of the backup generators available for critical facility and infrastructure customers before and during the PSPS.**

Table 8: Backup Power – Description, Capacity and Estimated Maximum Duration

Location	# of Gens or Batteries	Type of Backup Power	Generator/Battery Size	Maximum Duration of Operation	Actual PSPS Operation Status
<u>Butterfield Ranch</u> 14926 Great Southern Overland Stage Route Julian, CA 92036	3	Generators	275 kW	Generators can run indefinitely based on fuel supply	11/25 - 4:27 am to 11/26 - 1:09 pm
<u>Cameron Corners</u> 1339 Buckman Springs Rd Campo, CA 91906	2	Generators	275 kW	Generators can run indefinitely based on fuel supply	On Standby
	1	Mobile Battery	362 kW / 1499 kWh	4.14 hours but time can be extended with conventional generation	On Standby
<u>Descanso Community Resource Center (Library)</u> 9545 River Drive Descanso, CA 91916	1	Mobile Battery	15 kW / 500 kWh	33 hours at full rating for EV vehicle charging	On Standby for EV Vehicle Charging
<u>Julian</u> 1901 4th Street Julian, CA 92036	1	Generator	1 MW	Generators can run indefinitely based on fuel supply	On Standby
<u>Shelter Valley</u> 7878 Great Southern Overland Stage Route Julian, CA 92036	3	Generators	275 kW	Generators can run indefinitely based on fuel supply	11/25 - 1:07 am to 11/26 - 2:05 pm

Table 9: Community Generator Program Sites

Location	# of Gens or Batteries	Type of Backup Power	Generator Size	Maximum Duration of Operation	PSPS Operation Status
<u>Descanso</u> Heavenly Oaks Mobile Park 26835 Old Hwy 80 Guatay, CA 91931	1	Generator	25 kW	Generators can run indefinitely based on fuel supply	Stand By
<u>Dulzura</u> Barrett Mobile Park 1250 Barrett Lake Road Dulzura, CA 91917	1	Generator	25 kW	Generators can run indefinitely based on fuel supply	Stand By

c. The total number of backup generators provided to critical facility and infrastructure customer’s site immediately before and during the PSPS.

Generators/Mobile Batteries Deployed – 13 Total

- 11 Generators
- 2 Mobile Batteries

Table 10: Total Number of Backup Generators and Mobile Batteries

Location	# of Gens or Batteries	Generator/Battery Size	Fuel Type
<u>Butterfield Ranch</u> 14926 Great Southern Overland Stage Route Julian, CA 92036	3 – Generators	275 kW	Diesel
<u>Cameron Corners</u> 1339 Buckman Springs Rd Campo, CA 91906	2 –Generators 1 – Mobile Battery	Generator: 275 kW Mobile Battery: 362 kW / 1499 kWh	Generator: Diesel Mobile Battery: Energy Storage
<u>Descanso Community Resource Center (Library)</u> 9545 River Drive Descanso, CA 91916	1 - Mobile Battery	15 kW / 500 kWh	Energy Storage
<u>Julian</u> 1901 4th Street Julian, CA 92036	1 – Generator	1 MW	Diesel
<u>Shelter Valley</u> 7878 Great Southern Overland Stage Route Julian, CA 92036	3 – Generators	275 kW	Diesel
<u>Descanso</u> Heavenly Oaks Mobile Park 26835 Old Hwy 80 Guatay, CA 91931	1 – Generator	25 kW	Diesel
<u>Dulzura</u> Barrett Mobile Park 1250 Barrett Lake Road Dulzura, CA 91917	1 – Generator	25 kW	Diesel

d. How the utility deployed this backup generation to the critical facility and infrastructure customer’s site.

SDG&E held several coordination meetings involving all key personnel leading up to the PSPS to determine responsibilities, equipment, modes of communication, supporting team members required, and other required tasks to support deployment of backup generation. SDG&E’s Meteorology Team determined areas of adverse weather conditions, and the Distributed Energy Resources (DER) Team staged

SDG&E Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

personnel at the appropriate location to set-up microgrids to mitigate PSPS events. Teams were scheduled for 12-hour shifts, around the clock, to staff each site. SDG&E’s DER Team constantly monitored DOC-E and meteorology reports for updates to determine deployments and demobilizations.

e. An explanation of how the utility prioritized how to distribute available backup generation.

Many sites were pre-chosen as part of an analysis completed for the 2020-2022 SDG&E Wildfire Mitigation Plan Update parameters. SDG&E added temporary generators as part of SDG&E’s Community Generator Program where permitting issues prevented installation of new backup power systems.

f. Identify the critical facility and infrastructure customers that received backup generation.

Table 11: Critical Facility and Infrastructure Customers

Location	# of Customers	Critical Facility and Infrastructure Customers
<u>Butterfield Ranch</u> 14926 Great Southern Overland Stage Route Julian, CA 92036	119	- Water Wells Infrastructure - Sewage Infrastructure
<u>Cameron Corners</u> 1339 Buckman Springs Rd Campo, CA 91906	8	- Cal Fire San Diego 40 - ATT Telecom Hub - Library – Cool Zone - Urgent Care - Schools - Gas Stations
<u>Descanso Community Resource Center</u> 9545 River Drive Descanso, 91916	EV Vehicle Charger	This Library is the Descanso Community Resource Center
<u>Julian</u> 1901 4th Street Julian, CA 92036	132	- San Diego County Sheriff’s Department - San Diego Fire Station 50 - Library - Julian Branch – Cool Zone - Julian Medical Center - Schools - Gas Stations
<u>Shelter Valley</u> 7878 Great Southern Overland Stage Route Julian, CA 92036	219	- Water Wells Infrastructure - Sewage Infrastructure

Table 12: Community Generator Program Sites

Location	# of Customers	Critical Facility and Infrastructure Customers
<u>Descanso</u> Heavenly Oaks Mobile Pk 26835 Old Hwy 80 Guatay, CA 91931	1 (Club House)	Club House served as a temporary food distribution site, but is not classified as a Critical Facility
<u>Dulzura</u> Barrett Mobile Park 1250 Barrett Lake Road Dulzura, CA 91917	1 (Club House)	Club House served as a temporary food distribution site, but is not classified as a Critical Facility

Any questions related to the information under this item may be directed to SDG&E at the following e-mail address: DERGeneratorDeploymentTeam@SDGE.com.¹

Section 7 – Complaints and Claims

- 1. The number and nature of complaints received as the result of the de-energization event and claims that are filed against the utility because of de-energization. The utility must completely report all the informal and formal complaints, meaning any expression of grief, pain, or dissatisfaction, from various sources, filed either with CPUC or received by the utility as a result of the PSPS event.**

- a. Complaints**

As of December 3, 2021, SDG&E received the following complaints regarding this PSPS event:

¹ This e-mail inbox is monitored by SDG&E’s Distributed Energy Resources Generator Deployment team.

Table 13: Number and Nature of Complaints Received

Nature of Complaint	Number of Complaints
PSPS Frequency/Duration Including, but not limited to complaints regarding the frequency and/or duration of PSPS events, delays in restoring power, scope of PSPS and dynamic of weather conditions	8
Safety/Health Concern Including, but not limited to complaints regarding difficulties experienced by AFN/MBL populations, traffic accidents due to non-operating traffic lights, inability to get medical help, well water or access to clean water, inability to keep property cool/warm during outage raising health concern	1
Communications/Notifications Including, but not limited to complaints regarding lack of notice, excessive notices, confusing notice, false alarm notice, problems with getting up-to-date information, inaccurate information provided, not being able to get information in the prevalent languages and/or information accessibility, complaints about website, Public Safety Partner Portal, REST/DAM sites (as applicable)	6
Outreach/Assistance Including, but not limited to complaints regarding community resource centers, community crew vehicles, backup power, hotel vouchers, other assistance provided by utility to mitigate impact of PSPS	1
General PSPS Dissatisfaction/Other Including, but not limited to complaints about being without power during PSPS event and related hardships such as food loss, income loss, inability to work/attend school, plus any PSPS-related complaints that do not fall into any other category	23
Total:	39

b. Claims

As of December 3, 2021, SDG&E received the following claims regarding this PSPS event:

Table 14: Claims Filed Against SDG&E Due to De-energization

Nature of Claim	Number of Claims
Property Damage	2
Solar Related	0
Food Loss	2
Inconvenience of Being Without Power	3
Business Loss	0
Hotel Stays	11
Generator	0
Total:	18

Section 8 – Power Restoration

1. A detailed explanation of the steps the utility took to restore power.

When a circuit is de-energized, meteorology will add it to the restoration forecast list, and the team will ascertain the date and time when forecasted wind gusts are expected to reach 7mph less than the alert speed and will likely continue to decline. As circuits are de-energized, they are added to the dynamic restoration forecast list. Circuit restoration is prioritized based on the order in which favorable weather conditions will prevail in each area. Forecasts trending in a favorable manner will garner the prioritization of patrols. Once the patrolling of the lines is complete, the circuit will be re-energized knowing that favorable weather is in the forecast for that circuit.

2. The timeline for power restoration, broken down by phase if applicable.

Restorations began on 11/25/21 at 10:00 and concluded on 11/26/21 at 16:37. For detailed information on restorations on each circuit segment, please see Table 3 in Appendix 5.

3. For any circuits that require more than 24 hours to restore, the utility shall explain why it was unable to restore each circuit within this timeframe, using the format below.

No circuits exceeded a 24-hour restoration time.

Section 9 – Community Resource Centers

1. The address of each location during a de-energization event, the location (in a building, a trailer, etc.), the assistance available at each location, the days and hours that it was open, and number of attendances.

Table 15: Community Resource Centers

#	County	Site Name	Address	Operating Hours	Attendance	Site Type	Amenities Provided
1	San Diego	Descanso County Library	9545 River Drive Descanso, CA 91916	<ul style="list-style-type: none"> • 11/25 8am – 10pm • 11/26 8am – 5pm 	<ul style="list-style-type: none"> • 11/25 – 26 • 11/26 – 27 	Drive-thru	Bottled water, snacks, medical device charging, cell phone charging, Ice, bulk water, water bags, hot meals, outage updates, Wi-Fi, Emergency Preparedness kits
2	San Diego	Potrero Community Center	24550 Highway 94 Potrero CA, 91963	<ul style="list-style-type: none"> • 11/25 8am – 10pm • 11/26 8am – 1:30pm 	<ul style="list-style-type: none"> • 11/25 – 32 • 11/26 – 18 	Drive-thru	Bottled water, snacks, medical device charging, cell phone charging, Ice, bulk water, water bags, hot meals, outage updates, Wi-Fi, Emergency Preparedness kits
3	San Diego	Valley Center Branch Library	29200 Cole Grade Rd Valley Center, CA 92082	<ul style="list-style-type: none"> • 11/25 – 12pm – 6pm 	<ul style="list-style-type: none"> • 11/25 – 1 	Drive-thru	Bottled water, snacks, medical device charging, cell phone charging, Ice, bulk water, water bags, outage updates, Wi-Fi, Emergency Preparedness kits

2. Any Deviations and explanations from the CRC requirement including operation hours, ADA accessibility and equipment.

Operation hours conclude at 10pm unless otherwise noted due to power restorations, in which case the CRC was closed at the time of restoration.

3. A map identifying the location of each CRC and the de-energized areas.

Section 10 – Mitigations to Reduce Impact

1. Mitigation actions and impacts (both waterfall graph and map) including: sectionalization devices, temporary generation, microgrids, permanent backup generation, transmission switching, covered conductor, and any other grid hardening that mitigated the impact of the event.

SDG&E implements mitigation measures used to decrease the risk of utility caused wildfires by reinforcing the standards listed in SDG&E Electric Standard Practice 113.1—Operations and Maintenance Wildland Fire Prevention Plan and increasing use of prevention resources. All SDG&E field personnel are required to receive annual training on fire prevention. All non-emergency work is restricted in areas where there is extreme fire potential.

During this event, SDG&E strategically placed observers and field crews at or near the location of the facilities forecast to experience the most severe weather conditions. By staging personnel at these locations, SDG&E was able to quickly react to changes in conditions and ensure energized lines are operated safely with no imminent threats to their integrity, and that de-energized lines are inspected for safety prior to re-energization.

A summary of the avoided customer impacts by mitigation actions during this event is included in the table below:

Table 16: Summary of Avoided Customer Impacts

Mitigation Action	Avoided Impacts
Sectionalizing Devices	7,956
Microgrids	340
Other Grid Hardening	31

Sectionalizing Devices:

SDG&E utilized sectionalization during this weather event to reduce PSPS customer impacts. Leveraging real-time data from the SDG&E weather network in the area of the severe weather, SDG&E was able to confirm the strong winds were isolated to portions of the majority of impacted circuits. As a result, SDG&E de-energized only portions of 10 out of 13 circuits impacted during this weather event, as opposed to entire circuits. By de-energizing only portions of the circuits, SDG&E was able to avert PSPS impacts for approximately 7,956 customer accounts.

A summary of the avoided customer impacts by circuit during this event is included in the table below:

Table 17: Summary of Avoided Customer Impacts by Circuit

Circuit	Avoided Impacts
79	698
157	318
214	307
217	1,086
357	1,166
358	790
448	902
524	1,304
1166	60
1458	1,325
Total:	7,956

Temporary Generation:

As part of its Generator Grant Program, SDG&E has offered portable backup battery units (e.g., Goal Zero Yeti 3000) to MBL customers who live in the HFTD and have been impacted by PSPS in previous years. As of December 2021, SDG&E has provided more than 3,689 backup batteries since the start of the program in 2019.

In addition, SDG&E has completed the installation of 390 generators as part of the Fixed Backup Power Program (formerly the Whole Home Generator Program), providing those customers the option to remain energized during the PSPS event. In support of this program, SDG&E’s team deployed two portable, conventional generators at the Barrett Mobile Home Park in Dulzura and at the Heavenly Oaks Mobile Home Park in Descanso. Ultimately, there were no outages on these circuits, and the generators were not engaged.

Microgrids:

SDG&E successfully established temporary configurations for microgrids at the following locations: Julian, Butterfield Ranch, Shelter Valley, and Cameron Corners. For this event, only Butterfield Ranch and Shelter Valley were engaged while Julian and Cameron Corners were on stand-by. While these customers are included in the customer count impacted by de-energizations provided in response to Question #3 above, the customer counts provided below still received electricity from SDG&E through the microgrid configurations and did not suffer loss of power as a result of the PSPS events listed in this post-event report.

A summary of the customers served by these microgrids is included in the table below:

Table 18: Summary of Customers Served by Microgrids

Microgrid Location	Total Customers
Butterfield Ranch	119
Shelter Valley	221

Permanent Backup Generation

SDG&E currently has two projects nearing completion for permanent backup generation: Cameron Corners and Ramona Air Attack Base. Once complete, these sites will be 100% renewable-based microgrids.

Transmission Switching:

SDG&E did not utilize any transmission switching for this event. TL634 was on the list for potential transmission switching, but after further investigation into the TL alert speed and the expected forecast, SDG&E determined that it was not necessary to switch. SDG&E grid control coordinated pre-event with the Imperial Irrigation District to prepare to switch in TL800, which would allow us to restore 2,766 customers at Borrego if needed.

Other Grid Hardening:

Hellhole Canyon weather station reported a peak of 61 mph winds during the early morning hours of 11/25. This value would have historically resulted in sectionalizing device C1030-987 being de-energized and 31 customers being without power. As a result of undergrounding the distribution electrical system around this weather station, SDG&E avoided de-energizing these customers for this event. Historically, this section of circuit 1030

has been one of our service territory’s most wind-prone areas subject to PSPS de-energizations.

Section 11 – Lessons Learned from this Event

1. Threshold analysis and the results of the utility’s examination of whether its thresholds are adequate and correctly applied in the de-energized areas.

SDG&E believes its thresholds for de-energizing during this event were adequate. SDG&E will continue to monitor its performance throughout the season to determine whether changes to its thresholds are warranted. Such changes require more time to evaluate because they could involve updates to models, testing of those updates and stakeholder engagement to institute those changes.

2. Any lessons learned that will lead to future improvement for the utility.

Table 19: Lessons Learned from PSPS Event

Issue	Discussion	Resolution
Many new EOC responders	The EOC has an annual 40% attrition rate which has a high training burden. With the virtual environment, it is challenging to effectively train responders from 35 business units throughout the company many who have never had an emergency response role.	Diversify training methodologies and delivery modalities.
Manual Data entry	The CalOES PowerPoint requires extensive manual data entry from multiple business units.	Resolution is pending.
Public Safety Partner notification system had a category flagging issue with 22 contacts	22 contacts were not coded appropriately in the system, which affected their notifications.	They have all been recoded and the category has been deleted.
AFN Support Partner: Warm Food	Caterers contracted to supply food support for warm meals were closed for Thanksgiving holiday and did not have staffing support or food inventory supply to support food requested.	Logistics and supplier diversity teams were able to assist with vendors for this PSPS. Warm food contracts and availability confirmation earlier in event to allow for alternatives if needed.
Customer Notifications received as “Spam” calls	SDG&E received feedback from customers that notification calls are being flagged as spam calls, so they are not answering them and we do not have the ability to leave a voicemail on a rejected call.	SDG&E will meet with telecoms to determine how to ensure emergency calls are not flagged as Spam.

Section 12 – Other Relevant Information

1. This section must include any other relevant information determined by the utility.

SDG&E would like to note that Community Resource Centers saw reduced traffic during this holiday activation – 104 cars in total across the two days in which CRCs were made available. Specifically, SDG&E notes that hourly visitor tracking revealed only 8 visitors traveled to the open CRCs between the hours of 6pm and 10pm

Officer Verification

I am an officer of San Diego Gas & Electric Company and am authorized to make this verification on its behalf. I declare under penalty of perjury that the contents of the foregoing document are true to my own knowledge, except as to matters that are stated on information and belief, and as to those matters, I believe them to be true.

Executed this 10th day of December 2021, at San Diego, California.

/s/ John D. Jenkins

John D. Jenkins

Vice President – Electric System Operations

San Diego Gas & Electric Company

MESSAGE NUMBER	TIMING	TARGET POPULATIONS	Phone	Email	Text and PSPS App Message Content
M1 Customers	48-72 hours prior to PSPS (Outage Alert)	Accountholders and PSPS App Users	<p><i>This is an important safety message from SDG&E about a possible public safety power shutoff affecting your service. Press any key to continue.</i></p> <p>Outage Alert: SDG&E is monitoring high fire risk weather conditions forecasted to begin within 48 to 72 hours. Due to these forecasts, your area is under a Public Safety Power Shutoff Alert. If power is shut off to help reduce the risk of a wildfire, we will not turn it back on until conditions are safe to do so. We know being without electricity is difficult and we appreciate your patience. Safety is our top priority during high fire risk conditions.</p> <p>We recommend you plan for an extended outage. We will provide daily updates until the high fire risk conditions have passed or power has been restored. You will receive an Outage Warning if we determine it is necessary to turn off your power. Weather forecasts can change quickly. Power shutoff forecasts will be most accurate the day of the potential outage. If the need arises, we will open a Community Resource Center in your area and you will be notified. You can charge small electronics, get water and snacks, and learn more about the power outage in your area. For Community Resource Center locations and hours of operation, visit sdge.com/resource-centers</p> <p>If you rely on uninterrupted power for your health and safety, or need assistance, additional support may be available. For more information, visit sdge.com/Ready. Thank you.</p>	<p>Subject Line: Outage Alert: SDG&E Public Safety Power Shutoff - Outage Possible in 48-72 hours.</p> <p>Body Copy: Outage Alert: SDG&E is monitoring high fire risk weather conditions forecasted to begin within 48 to 72 hours. Subject: SDG&E Public Safety Power Shutoff Possible in 48-72 Hours

This is an important safety message from SDG&E

SDG&E is monitoring possible [high fire weather risk conditions](#) forecasted to begin within 48-72 hours. The National Weather Service has issued a [Fire Weather Watch](#) for late Wednesday night through Friday afternoon for strong gusty winds and low humidity. These conditions may force SDG&E to shut off power to reduce the risk of a wildfire.

Approximately 28,600 customers, including 2,229 Medical Baseline customers, in the following communities are being notified of the potential for a Public Safety Power Shutoff.

- Alpine
- Boulevard
- Campo
- Descanso
- Dulzura
- El Cajon
- Escondido
- Fallbrook
- Jamul
- Julian
- Lakeside
- Mount Laguna
- Olivenhain
- Palomar Mountain
- Pauma Valley
- Pine Valley
- Potrero
- Poway
- Ramona
- San Marcos
- Santa Ysabel
- Valley Center
- Warner Springs
- Barona Reservation
- Campo Reservation
- Cuyapaipe Reservation
- La Jolla Reservation
- La Posta Reservation
- Los Coyotes Reservation
- Manzanita Reservation
- Mesa Grande Reservation
- Pala Reservation
- Pauma and Yuima Reservation
- Rincon Reservation

- San Pasqual Reservation
- Santa Ysabel Reservation
- Sycuan Reservation
- Viejas Reservation

If power is shut off, we will not turn it back on until conditions are safe to do so. We know being without electricity is difficult and we appreciate your patience and partnership as we keep safety our top priority during these potential high fire risk conditions. Please monitor your email for more detailed communication tomorrow.

For more information, please log-in to the [SDG&E Public Safety Partner Portal](#). If you have not yet signed on the portal, we encourage you to do so at this time. To register, or for support with the Portal, please email eseodsdge@sdge.com.

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

The National Weather Service today upgraded the Fire Weather Watch to a [Red Flag Warning](#), to be in effect from Thursday, November 25 at 4 a.m., through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains. Strong gusty Santa Ana winds and low humidity are forecast through Saturday. The winds are forecast to peak on Thursday morning with gusts 40 - 60 mph.

SDG&E plans to activate its Emergency Operations Center to monitor high fire risk weather conditions which may force SDG&E to shut off power to reduce the risk of wildfire. The estimated start time of event is 6 p.m. on Wednesday, November 24. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

Approximately 43,276 customers, including 3,345 Medical Baseline customers, in the following communities are being notified of the potential for a Public Safety Power Shutoff.

- Alpine

Subject: SDG&E has shut off power for public safety

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

The National Weather Service has issued a Red Flag Warning to be in effect from tonight at 9 p.m., through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains, however strong winds began as early as 8 p.m. tonight. Forecasted high fire risk weather conditions could affect the power lines serving local communities. These conditions may require SDG&E to shut off power to reduce the risk of wildfire.

SDG&E's Emergency Operations Center was activated at 6 p.m. today. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

Due to high fire risk weather conditions affecting power lines, the power has been shut off for the public safety to portions of the following communities:

- Boulevard
- Descanso

We estimate 84 Medical Baseline (MBL) customers live in the affected area. Power may be off overnight and remain off for up to 72 hours. When conditions are safe, SDG&E will inspect the power lines to make sure they are safe to operate and determine when power can be turned back on.

For more information, please log-in to the SDG&E Public Safety Partner Portal. If you have not yet signed on the portal, we encourage you to do so at this time. To register, or for support with the Portal, please email eseodsdge@sdge.com. Please also see the Public Safety Power Shutoff map.

Additional information can be found at sdge.com/ready. The Public Safety Power Shutoff mobile App, Alerts by SDG&E, is also available for download for updates for potential and active Public Safety Power Shutoff events.

Subject: SDG&E has shut off power for public safety

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

The National Weather Service has issued a Red Flag Warning to be in effect from November 24 at 9 p.m., through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains. Forecasted high fire risk weather conditions could affect the power lines serving local communities. These conditions may require SDG&E to shut off power to reduce the risk of wildfire. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

As of 2:45 a.m. due to high fire risk weather conditions affecting power lines, the power has been shut off for public safety to portions of the following communities:

- Boulevard
- Campo Reservation
- Descanso
- Pala

We estimate 89 Medical Baseline (MBL) customers live in the affected area. Power may be off overnight and remain off for up to 72 hours. When conditions are safe, SDG&E will inspect the power lines to make sure they are safe to operate and determine when power can be turned back on.

For more information, please log-in to the SDG&E Public Safety Partner Portal. If you have not yet signed on the portal, we encourage you to do so at this time. To register, or for support with the Portal, please email eseodsdge@sdge.com. Please also see the Public Safety Power Shutoff map.

Additional information can be found at sdge.com/ready. The Public Safety Power Shutoff mobile App, Alerts by SDG&E, is also available for download for updates for potential and active Public Safety Power Shutoff events.

Subject: SDG&E has shut off power for public safety

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

The National Weather Service has issued a Red Flag Warning to be in effect from November 24 at 9 p.m., through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains. Forecasted high fire risk weather conditions could affect the power lines serving local communities. These conditions may require SDG&E to shut off power to reduce the risk of wildfire. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

As of 6:00 a.m. due to high fire risk weather conditions affecting power lines, the power has been shut off for public safety to portions of the following communities:

- Alpine
- Boulevard
- Campo Reservation
- Cuyapaibe Reservation
- Descanso
- La Jolla Reservation
- Pala
- Pauma Reservation
- Pauma Valley
- Potrero
- Viejas Reservation

We estimate 243 Medical Baseline (MBL) customers live in the affected areas. Power may remain off for up to 72 hours. When conditions are safe, SDG&E will inspect the power lines to make sure they are safe to operate and determine when power can be turned back on.

For more information, please log-in to the SDG&E Public Safety Partner Portal. If you have not yet signed on the portal, we encourage you to do so at this time. To register, or for support with the Portal, please email eseodsdge@sdge.com. Please also see the Public Safety Power Shutoff map.

Additional information can be found at sdge.com/ready. The Public Safety Power Shutoff mobile App, Alerts by SDG&E, is also available for download for updates for potential and active Public Safety Power Shutoff events.

Subject: SDG&E power remains turned off for public safety. SDG&E is determining when power can be turned back on.

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

A Red Flag Warning from the National Weather Service remains in effect through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains. These conditions may require SDG&E to shut off power to reduce the risk of wildfire. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

As of 4 p.m., due to high fire risk weather conditions affecting power lines, the power has been shut off for public safety to portions of the following communities:

- Alpine
- Boulevard
- Campo Reservation
- Descanso
- Jamul
- Pauma Valley
- Potrero

When conditions are safe, SDG&E will inspect the power lines to make sure they are safe to operate and determine when power can be turned back on. Where conditions have improved, SDG&E has restored power to approximately 1,216 customers, with power remaining off to approximately 3,905 customers. We estimate 352 Medical Baseline (MBL) customers live in the affected areas. The following communities have been partially or fully restored:

- West Alpine
- Cuyapaibe Reservation
- La Jolla Reservation
- Pala
- Pauma Reservation
- Viejas Reservation

Please note: We are restoring customers as quickly as possible today as it is Thanksgiving, however, these same areas may be impacted by strong winds overnight and may be de-energized again. Customers have received notification that there is the potential for additional de-energizations.

Community Resource Centers: The following Community Resource Centers will be open until 10 p.m.

Descanso Community Resource Center
Descanso County Library
9545 River Drive
Descanso, 91916

Potrero Community Resource Center
Potrero Community Center
24550 Highway 94
Potrero, 91963

Valley Center Community Resource Center
Valley Center Branch Library

Subject: SDG&E has shut off power for public safety. Power will remain out overnight

This is an important safety message from SDG&E. This information is intended for public safety and government partners. Please do not share this message publicly. Please use the social media kit and community flyer provided below to share with your communities.

A Red Flag Warning from the National Weather Service remains in effect through Friday, November 26 at 6 p.m. for the San Diego County valleys and mountains. These conditions may require SDG&E to shut off power to reduce the risk of wildfire. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

As of 10:15 p.m., due to high fire risk weather conditions affecting power lines, the power has been shut off for public safety to portions of the following communities:

- Alpine
- Boulevard
- Campo Reservation
- Descanso
- Fallbrook
- Jamul
- Potrero
- Warner Springs

When conditions are safe, SDG&E will inspect the power lines to make sure they are safe to operate and determine when power can be turned back on. SDG&E crews will continue to work as long as conditions are safe; however power will remain off overnight. SDG&E has restored power to approximately 1,406 customers, with power remaining off to approximately 4,452 customers. We estimate 399 Medical Baseline (MBL) customers live in the affected areas.

Community Resource Centers: The following Community Resource Centers will open at 8 a.m. tomorrow.

Descanso Community Resource Center
Descanso County Library
9545 River Drive
Descanso, 91916

Potrero Community Resource Center
Potrero Community Center
24550 Highway 94
Potrero, 91963

Subject: SDG&E Survey Request on Recent Public Safety Power Shutoff

This is an important safety message from SDG&E.

On November 24-25, 2021, SDG&E initiated a Public Safety Power Shutoff to some communities due to high fire weather conditions. Decisions to implement Public Safety Power Shutoffs are not made lightly. Turning off power is a last resort and the overriding factor remains the same: keeping our communities safe. We've all seen the devastation that can occur from wildfires. However, we truly regret that power was shut off to some of our customers, especially over a holiday.

We continue to look for opportunities to improve our communication and engagement with our safety partners. Please consider taking this quick [survey](https://www.surveymonkey.com/r/PSPSPartnersurvey) by December 3, to help us identify opportunities for improvement.

<https://www.surveymonkey.com/r/PSPSPartnersurvey>

Thank you for your continued partnership keeping our communities safe,

SDG&E Liaison Officer

Subject: SDG&E Notification (11/22 @ 5:00 p.m.): Potential PSPS Event, November 24–27, 2021
Date: Monday, November 22, 2021 4:59:37 PM

Hello,

Today, November 22, 2021, SDG&E initiated its Public Safety Power Shutoff (PSPS) protocols based on Santa Ana weather conditions and a Fire Weather Watch issued by the National Weather Service forecasted to impact San Diego County starting on Wednesday, November 24, 2021. SDG&E has not activated its Emergency Operations Center (EOC). SDG&E's EOC staff will remain in a monitoring and planning mode until further notice.

At this time, SDG&E expects to provide advanced notification to 28,664 customer accounts that will potentially be impacted by this event, including 2,229 MBL customers. All of the potentially impacted areas are located within Tier 2 and 3 of the HFTD. Additional information, including anticipating timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Weather event details

- Santa Ana weather conditions are expected to arrive in SDG&E's service area on Wednesday, November 24. Winds are expected to peak in the morning on Thursday, November 25 and gradually decrease by Friday evening.
- Fire Potential Index (FPI) on Thursday through Saturday expected to be elevated in all of San Diego County and in Southern Orange County.

Unless there are changes requiring immediate notification, we will provide another update tomorrow, Tuesday, November 23.

Thank you,
SDG&E Regulatory Affairs

Date: Tuesday, November 23, 2021 1:30:33 PM

Hello,

SDG&E Public Safety Power Shutoff (PSPS) protocols remain activated based on Santa Ana weather conditions and a Red Flag Warning issued by the National Weather Service forecasted to impact San Diego County starting on Wednesday, November 24, 2021. SDG&E has not activated its Emergency Operations Center (EOC) at this time. SDG&E's EOC staff will remain in a monitoring and planning mode until further notice. Based on updated weather forecasts, SDG&E plans to activate its EOC at 6:00 p.m. on Wednesday, November 24.

Today, November 23, SDG&E provided advanced notification to 43,276 customer accounts that will potentially be impacted by this event, including 3,345 MBL customers. All of the potentially impacted areas are located within Tier 2 and 3 of the HFTD. Additional information, including anticipating timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Weather event details

- Santa Ana weather conditions are expected to arrive in SDG&E's service area on Wednesday, November 24. Winds are expected to peak in the morning on Thursday, November 25 and gradually decrease by Friday evening.
- Fire Potential Index (FPI) on Thursday through Saturday expected to be elevated in all of San Diego County and in Southern Orange County.

Unless there are changes requiring immediate notification, we will provide another update tomorrow, Wednesday, November 24.

Date: Wednesday, November 24, 2021 3:19:24 PM

Hello,

SDG&E Public Safety Power Shutoff (PSPS) protocols remain activated based on Santa Ana weather conditions and a Red Flag Warning issued by the National Weather Service forecasted to impact San Diego County starting on Wednesday, November 24, 2021. SDG&E has not activated its Emergency Operations Center (EOC) at this time. SDG&E's EOC staff will remain in a monitoring and planning mode until further notice. SDG&E still plans to activate its EOC at 6:00 p.m. on Wednesday, November 24.

Today, November 24, SDG&E provided advanced notification to 13,275 additional customer accounts that will potentially be impacted by this event, including 1,390 MBL customers. All of the potentially impacted areas are located within Tier 2 and 3 of the HFTD. Additional information, including anticipating timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Weather event details

- Santa Ana weather conditions are expected to arrive in SDG&E's service area on Wednesday, November 24. Winds are expected to peak in the morning on Thursday, November 25 and gradually decrease by Friday evening.
- Fire Potential Index (FPI) on Thursday through Sunday expected to be elevated in all of San Diego County and in Southern Orange County.

Unless there are changes requiring immediate notification, we will provide another update once SDG&E's EOC is activated.

Thank you,
SDG&E Regulatory Affairs

Subject: SDG&E Notification (11/24 @ 6:02 p.m.): EOC Activated for PSPS Event, November 24–27, 2021
Date: Wednesday, November 24, 2021 6:03:36 PM

Hello,

SDG&E has activated its Emergency Operations Center (EOC) as of 6:00 p.m. on Wednesday, November 24 due to Santa Ana conditions and a Red Flag Warning in effect in the region, which could necessitate Public Safety Power Shutoffs (PSPS).

There are no changes to the potential customer impacts provided in the previous update. Currently, there are no active PSPS in SDG&E's service area. Additional information, including anticipating timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

If you have any questions, please respond directly to this email; this inbox will be monitored throughout the duration of the event.

Thank you,
SDG&E Regulatory Affairs

Date: Wednesday, November 24, 2021 10:17:45 PM

Hello,

SDG&E has initiated Public Safety Power Shutoffs (PSPS) in areas of San Diego County due to Santa Ana conditions and a Red Flag Warning in effect in the region.

As of Thursday, November 25 at 9:53 p.m., SDG&E has implemented PSPS for 1 circuit/device, impacting 19 customer accounts, including 2 Medical Baseline (MBL) customers in the community of Descanso. Restoration is currently estimated for Saturday, November 27 at 6:00 p.m. Please note, estimated restoration times are subject to change based on field patrol observations and weather conditions.

Additional information, including anticipated timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Thank you,
SDG&E Regulatory Affairs

Subject: RE: SDG&E Notification (11/26 @ 4:05 p.m.): Restoration Efforts Continue for PSPS Event, November 24-26, 2021
Date: Friday, November 26, 2021 4:08:46 PM

Hello,

SDG&E has initiated and completed patrols for restoration of certain circuits/devices impacted by PSPS. At this time, SDG&E completed patrols for 9 circuits/devices serving 1,664 customer accounts, including 149 MBL, in the communities listed below.

- Alpine
- Jamul
- Descanso
- Potrero
- Julian

There have been no additional de-energizations since the previous update. As of 3:38 p.m., PSPS have been implemented for 16 circuits/devices, impacting customers associated with 5,019 customer accounts, including 543 MBL. SDG&E has re-energized 18 devices serving 5,231 customer accounts, including 540 MBL. Restoration is currently estimated for Friday, November 26 at 05:00 p.m. Please note, estimated restoration times are subject to change based on field patrol observations and weather conditions.

Additional information, including anticipated timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Thank you,
SDG&E Regulatory Affairs

Subject: SDG&E Notification (11/26 @ 12:05 p.m.): Restoration Efforts Continue for PSPS Event, November 24-27, 2021

Hello,

SDG&E has initiated patrols for restoration of certain circuits/devices impacted by PSPS. At this time, SDG&E expects to complete patrols for 9 circuits/devices serving 1,664 customer accounts, including 149 MBL, in the communities listed below. SDG&E has not yet initiated the restoration process in areas forecast to experience continued severe weather.

- Alpine
- Jamul
- Descanso
- Potrero
- Julian

There have been no additional de-energizations since the previous update. As of 12:05 p.m., PSPS have been implemented for 10 circuits/devices, impacting customers associated with 2,995 customer accounts, including 176 MBL. SDG&E has re-energized 12 devices serving 3,962 customer accounts, including 440 MBL. Restoration is currently estimated for Saturday, November 27 at 05:00 p.m. Please note, estimated restoration times are subject to change based on field patrol observations and weather conditions.

Additional information, including anticipated timing of de-energization and re-energization, consolidated device information, maps, and GIS shapefiles are available on SDG&E's secure PSPS partner portal at <https://portal.sdgepartners.com>.

Thank you,
SDG&E Regulatory Affairs

Subject: SDG&E Notification (11/26 @ 5:01 pm.): All Service Restored and EOC Demobilized for PSPS Event, November 24-26, 2021
Date: Friday, November 26, 2021 5:02:33 PM

Hello,

SDG&E has restored service to all customers impacted by this PSPS event as of 4:37 p.m. on Friday, November 26, 2021. SDG&E's EOC is demobilized as of 4:53 pm on Friday, November 26, 2021.

SDG&E will file and serve its post-PSPS event report within 10 business days of the conclusion of this event in accordance with the guidelines set forth in Resolution ESRB-8, Decision (D.) 19-05-042, D.20-05-051, and D.21-06-034.

Thank you,
SDG&E Regulatory Affairs

Importance: High

This is an official notification that SDG&E has begun it's EOC 72 hour protocols for a PSPS that is possible on Thursday, Thanksgiving Day. More information and detail to be sent out this afternoon. We expect the NWS will issue a Fire Weather Watch for Wednesday and a RFW for Thursday and Friday.

Due to a potential PSPS on Thanksgiving, SDG&E will be sending out press release and other notifications a day earlier than the 48 hour notices that are standard protocol to provide the community more time to prepare.

The PSPS portal will be opened later this afternoon.

This is SDG&E with an important PSPS message:

The National Weather Service Red Flag Warning for the mountains and valleys of San Diego County are expected to remain in effect through Friday, November 26 at 6 p.m. We anticipate the event could last until Saturday, November 27, with full restoration by approximately 6 p.m.

As of **1500 (3:00 p.m.) 11/25/2021** due to high fire risk weather conditions affecting power lines, the power has been shut off for public safety to portions of the following communities, and notifications have been sent to these customers.

Current Customers Affected

Communities Shut Off	Number of Customers Shut Off
<ul style="list-style-type: none"> • Alpine • Boulevard • Campo Reservation • Cuyapaibe Reservation • Descanso • Jamul • La Jolla Reservation • Pala • Pauma Reservation • Pauma Valley • Potrero • Viejas Reservation 	<p style="font-size: 2em; color: #0070C0;">4,276</p>

Community Resource Centers

To see which CRCs are located close to you, please use our [CRC look-up tool](#).

Community Resource Center	Facility Name	Address
Descanso Community Resource Center Today's hours: 8 a.m. to 10 p.m.	Descanso County Library	9545 River Drive Descanso, 91916
Potrero Community Resource Center Today's hours: 8 a.m. to 10 p.m.	Potrero Community Center	24550 Highway 94 Potrero, 91963
Valley Center Community Resource Center Today's hours: Noon to 10 p.m.	Valley Center Branch Library	29200 Cole Grade Rd Valley Center, CA 92082

Customers should contact:

911 for all emergencies and life-threatening situations.

211 for requests for support and assistance.

We have partnered with 2-1-1 San Diego to assist individuals with access and functional needs (AFN), for more information dial 2-1-1 or visit their website: 211sandiego.org.

This is SDG&E with an important PSPS message:

As of 11/26 at 4:00 p.m., power is being restored to the last remaining customers affected by the PSPS event.

All Community Resource Centers are closed. The Red Flag Warning is scheduled to conclude at 6 p.m. today.

Please consider this message the close of this PSPS event.

Thank you for your support.

Appendix 5

PSPS Event Data Workbook (Excel File Filed Via CD-ROM)

SDG&E Post-Event Report Data

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

FILE DESCRIPTION

This file includes all tables and appendices that exceed five (5) rows from the Post Event Report submitted following the De-energization Event.

TABLE OF CONTENTS

SECTION 2: Decision Making Process

Table 2: Factors Considered in the Decision to Shut Off Power

SECTION 3: De-energized Time, Place, Duration and Customers

Table 3: Circuits De-energized

SECTION 5: Notifications

Table 5: Notification Failure

SECTION 6: Local and State Public Safety Partner Engagement

Table 6: Public Safety Partners Contacted

Table 7: Services Provides to Customers with AFN

Table 8: Backup Power – Description, Capacity and Estimated Maximum Duration

Table 10: Total Number of Backup Generators and Mobile Batteries

Table 11: Critical Facility and Infrastructure Customers

SECTION 7: Complaints and Claims

Table 13: Number and Nature of Complaints Received

Table 14: Claims Filed Against SDG&E Due to De-energization

SECTION 10: Mitigations to Reduce Impact

Table 17: Summary of Avoided Customer Impacts by Circuit

SECTION 11: Lessons Learned from this Event

Table 19: Lessons Learned from PSPS Event

APPENDIX

Appendix 1 – Customer Notifications: Descriptions, Dates, Times, and Scripts of Notifications

Appendix 2 – Public Safety Partner Notifications: Descriptions, Dates, Times, and Copies of Notifications

Appendix 3 – CPUC Notifications: Descriptions, Dates, Times, and Copies of Notifications

Appendix 4 – AFN Community Based Organization (CBO) Notifications: Descriptions, Dates, Times, and Copies of Notifications

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

* Device was de-energized due to on-site observation of vegetation damage, conductor movement, and flying debris.

¹ VRI and CRI provide a relative assessment of vegetation as well as conductor risk for each segment. Methodologies reported in SDG&E's 2021 WMP, Section 4.5.1.

² Calculations described in Section 2.2 and 2.4 of this report.

³ WiNGS Ops provides an estimated wind speed at which the total fire risk exceeds PSPS risk. This output incorporates both an estimate of likelihood of the risk as well as consequence. This model is in its early stages of implementation. NA indicates where models show extreme values that would not occur during operation and should therefore be disregarded.

⁴ This ratio depicts the comparison between wildfire consequence score using historical weather events and PSPS consequence score (excludes likelihood of risk). A value greater than 1 means the wildfire consequence exceeds the PSPS consequence.

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

¹Includes all customers that meet any of the 12 AFN conditions flagged in SDG&E's customer information system as long as MBL is not the only condition. However, there are 142 instances where the customer has MBL flagged in addition to any of the other 11 AFN conditions.

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

Appendix 5: PSPS Event Data Workbook

Table 5: Notification Failure

Notifications Sent To	Notification Failure Description	Number of Entities or Customer Accounts	Explanation
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48- to 72-hour advance notification.	0	While multiple partners at all of the required entities received the appropriate notifications, there were 22 contacts within 10 different entities that did not receive the 72 & 48 notifications. We have multiple contacts per entity to ensure redundancy of notifications. The issue with the 22 contacts was a database coding issue: they were not assigned in the database to a notification group category. Immediately after the 48-hour notification was issued we were made aware of the situation and corrected all 22 contact records in the database so they received all subsequent notifications.
	Entities who did not receive 1–4-hour imminent notification.	0	N/A
	Entities who did not receive any notifications before de-energization	0	N/A
	Entities who were not notified immediately before re-energization	0	N/A
	Entities who did not receive cancellation notification within two hours of the decision to cancel	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	3	1 customer did not have contact information in notification system. 2 customers were not notified due to system error.
	Facilities who did not receive 1-4 hour of imminent notifications.	75	1 customer did not have contact information in notification system. 74 customers were not notified due to system error. Note: Customers de-energized overnight received overnight message.
	Facilities who did not receive any notifications before de-energization.	3	1 customer did not have contact information in notification system. 2 customers were not notified due to system error.
	Facilities who were not notified at de-energization initiation.	35	1 customer did not have contact information in notification system. 34 customers were not notified due to system error.
	Facilities who were not notified immediately before re-energization.	86	1 customer did not have contact information in notification system. 85 customers were not notified due to system error.
	Facilities who were not notified when re-energization is complete.	73	1 customer did not have contact information in notification system. 72 customers were not notified due to system error.
	Facilities who did not receive cancellation notification within two hours of the decision to cancel	5	1 customer did not have contact information in notification system. 4 customers were not notified due to system error.
All Other Affected Customers	Customers who did not receive 24–48-hour advance notifications.	231	38 customers did not have contact information in notification system. 193 customers were not notified due to system error.
	Customers who did not receive 1–4-hour imminent notifications.	1,043	38 customers did not have contact information in notification system. 1,005 customers were not notified due to system error. Note: Customers de-energized overnight received an overnight message.
	Customers who did not receive any notifications before de-energization.	215	38 customers did not have contact information in notification system. 177 customers were not notified due to system error.
	Customers who were not notified at de-energization initiation.	884	38 customers did not have contact information in notification system. 846 customers were not notified due to system error.
	Customers who were not notified immediately before re-energization.	672	38 customers did not have contact information in notification system. 634 customers were not notified due to system error.
	Customers who were not notified when re-energization is complete.	1,406	38 customers did not have contact information in notification system. 1,368 customers were not notified due to system error.
	Customers who did not receive cancellation notification within two hours of the decision to cancel	2,503	38 customers did not have contact information in notification system. 2,465 customers were not notified due to system error.

Table 11: Critical Facility and Infrastructure Customers

Location	# of Customers	Critical Facility and Infrastructure Customers
<u>Butterfield Ranch</u> 14926 Great Southern Overland Stage Route Julian, CA 92036	119	- Water Wells Infrastructure - Sewage Infrastructure
<u>Cameron Corners</u> 1339 Buckman Springs Rd Campo, CA 91906	8	- Cal Fire San Diego 40 - ATT Telecom Hub - Library – Cool Zone - Urgent Care - Schools - Gas Stations
<u>Descanso Community</u> Resource Center (Library) 9545 River Drive Descanso, CA 91916	EV Vehicle Charger	This Library is the Descanso Community Resource Center
<u>Julian</u> 1901 4th Street Julian, CA 92036	132	- San Diego County Sheriff’s Department - San Diego Fire Station 50 - Library - Julian Branch - Cool Zone - Julian Medical Center - Schools - Gas Stations
<u>Shelter Valley</u> 7878 Great Southern Overland Stage Route Julian, CA 92036	219	- Water Wells Infrastructure - Sewage Infrastructure

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

Appendix 5: PSPS Event Data Workbook

Table 13: Number and Nature of Complaints Received

Nature of Complaint	Number of Complaints
<p>PSPS Frequency/Duration Including, but not limited to complaints regarding the frequency and/or duration of PSPS events, delays in restoring power, scope of PSPS and dynamic of weather conditions</p>	8
<p>Safety/Health Concern Including, but not limited to complaints regarding difficulties experienced by AFN/MBL populations, traffic accidents due to non-operating traffic lights, inability to get medical help, well water or access to clean water, inability to keep property cool/warm during outage raising health concern</p>	1
<p>Communications/Notifications Including, but not limited to complaints regarding lack of notice, excessive notices, confusing notice, false alarm notice, problems with getting up-to-date information, inaccurate information provided, not being able to get information in the prevalent languages and/or information accessibility, complaints about website, Public Safety Partner Portal, REST/DAM sites (as applicable)</p>	6
<p>Outreach/Assistance Including, but not limited to complaints regarding community resource centers, community crew vehicles, backup power, hotel vouchers, other assistance provided by utility to mitigate impact of PSPS</p>	1
<p>General PSPS Dissatisfaction/Other Including, but not limited to complaints about being without power during PSPS event and related hardships such as food loss, income loss, inability to work/attend school, plus any PSPS-related complaints that do not fall into any other category</p>	23
Total:	39

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

Table 17: Summary of Avoided Customer Impacts by Circuit

Circuit	Avoided Impacts
79	698
157	318
214	307
217	1,086
357	1,166
358	790
448	902
524	1,304
1166	60
1458	1,325
Total:	7,956

Public Safety Power Shutoff Post-Event Report: November 24 – November 26, 2021

Appendix 5: PSPS Event Data Workbook

Table 19: Lessons Learned from PSPS Event

Issue	Discussion	Resolution
Many new EOC responders	The EOC has an annual 40% attrition rate which has a high training burden. With the virtual environment, it is challenging to effectively train responders from 35 business units throughout the company many who have never had an emergency response role.	Diversify training methodologies and delivery modalities.
Manual Data entry	The CalOES PowerPoint requires extensive manual data entry from multiple business units.	Resolution is pending.
Public Safety Partner notification system had a category flagging issue with 22 contacts	22 contacts were not coded appropriately in the system which affected their notifications.	They have all been recoded and category has been deleted.
AFN Support Partner: Warm Food	Caterers contracted to supply food support for warm meals were closed for Thanksgiving holiday and did not have staffing support or food inventory supply to support food requested.	Logistics and supplier diversity teams were able to assist with vendors for this PSPS. Warm food contracts and availability confirmation earlier in event to allow for alternatives if needed.
Customer Notifications received as “Spam” calls	SDG&E received feedback from customers that notification calls are being flagged as spam calls, so they are not answering them and we do not have the ability to leave a voicemail on a rejected call.	SDG&E will meet with telecoms to determine how to ensure emergency calls are not flagged as Spam.
