

**Settlement Year 4 – First Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project**

PUBLIC, NON-CONFIDENTIAL VERSION

*For the period December 6, 2015 through March 5, 2016 (the Reporting Period)
Submitted April 5, 2016 by NRG EV Services LLC on behalf of the Dynege Parties¹*

EXECUTIVE SUMMARY

As of March 5, 2016 (the Reporting Date), NRG EV Services LLC (NRG) had a total of 134 Freedom Station sites either constructed or under development. During the Reporting Period, NRG completed construction on 8 additional Freedom Station installations, for a total of 113 completed sites.

25 out of the 113 Freedom Station sites are located in qualified low-income areas (PUMAs), exceeding the 20% commitment, and serving a broad demographic range at places they prefer to shop, meet and play locally, such as grocery stores, shopping centers and malls.

Freedom Stations are open for any electric vehicle and offer multiple forms of payment, including credit card. All stations support both the CHAdeMO and SAE CCS fast charging standards, and credit card swipe readers have been installed at all sites.

Utilization of the public charging infrastructure continues to increase during the Reporting Period. 95,683 fast charging sessions were reported in the quarter, an increase of 9.7% over last quarter. Together, these sessions consumed 878,021 kWh of electricity.

Overall, NRG has 2,690 Make-Ready Stubs under contract at 311 Make-Readies Sites. Of these, 1,617 Make-Ready Stubs have been installed at 211 sites.

All Technology Demonstration funds have been allocated and the three projects are underway.

A proposal to Air Resource Board for Opportunity Access funding to deploy and demonstrate electric school buses, including job training and infrastructure installation is still pending. NRG is currently in talks with partners to develop proposals that would allocate remaining funds.

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the “Agreement”).

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 134 Freedom Station sites were either completed, under construction, or in the permitting process.

The table below summarizes Freedom Station progress throughout the term of the Agreement:

<i>DC Fast Charging Station Progress</i>	Year-End 2013	Year-End 2014	Year-End 2015	2016
				Q1
Sites with Permits Submitted	22	17	3	8
Sites with Permits Approved	3	17	7	5
Sites under Construction	5	16	11	8
Sites Completed	10	56	105	113
Completed Sites w/ SAE Combo		23	105	113
Completed Sites w/ working credit card readers		3	105	113
Completed sites with credit card readers and SAE combo		2	105	113
Cumulative Settlement Target	40	100	160	

Installations

During the Reporting Period, NRG completed construction on 8 additional Freedom Stations, for a total of 113 Freedom Stations. Completed Freedom Stations are listed in [Appendix A](#), with new stations **in bold**.

Site Development

As of the Reporting Date, 8 additional Freedom Station sites were under construction, 5 more were fully permitted and another 8 sites had been submitted for permitting.

Low-Income PUMA Distribution

Twenty-five of the 113 Freedom Stations are located in low-income PUMAs: 11 in the San Francisco Bay Area, 8 in the Los Angeles Basin, 3 in San Diego County, and 3 in the San Joaquin Valley. They represent 22% of all operational sites, exceeding the goal of 20% in this category.

SAE Combo Rollout Complete

All Freedom Stations support the SAE combo standard (CCS). This fleet of CCS chargers represents the largest deployment in the world.

Credit Card Payment Upgrades Complete

All Freedom Stations are able to accept credit card swipe.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, NRG has 311 Make-Readies Sites under contract, representing 2,690 Make-Ready Stubs. Of these, 1,617 Make-Ready Stubs have been installed at 211 sites, as set forth in Appendix B.²

Pursuant to Section 4(b)(vi)(B) of the Agreement, NRG has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <http://www.nrgvgo.com/california-rev-progress/>.

USAGE DATA

NRG completed 95,683 fast-charging sessions in the first quarter at Freedom Station sites and dispensed over 878,021 kilowatt-hours of electricity, increases of 9.7% and 4.1%, respectively, over the previous quarter.

This translates to over 2.6 million miles driven on electricity in this quarter alone, displacing over 87,000 gallons of gasoline (assuming 30 mpg).

Appendix C, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately.

TECHNOLOGY DEMONSTRATION PROGRAMS

Stationary Storage Plus Electric Charging (SSPEC)

Project Summary

The Stationary Storage Plus Electric Charging (or SSPEC) project will investigate how incorporating stationary batteries with DC Level 3 electric vehicle (EV) charging infrastructure can reduce the cost of developing, constructing, and operating public Fast Chargers without the use of incentives. The project will do this by:

1. Deploying a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and control technology.
2. Running a number of tests with various configurations of devices at the SSPEC site.
3. Analyzing results from the SSPEC site and historical data from EVgo's charging station network to identify load profiles, deployment sites, and utility territories which can benefit most from backup batteries and/or generation on site.

Upon successful economic and operational demonstration, NRG intends to commercialize these technologies and integrate them into its broader Freedom Station rollout. Ultimately, NRG believes that SSPEC will enable faster deployment of DC Fast Chargers by both EVgo and third parties at a wider variety of locations, and for a lower total cost of ownership to property owners

² These numbers are slightly higher than numbers reported in the Year 3 Annual Report due to minor updates and adjustments.

and electric vehicle service providers alike.

Previous Quarter Activities

With the start of 2016, the SSPEC project took a leap into Phase II activities for the demonstration site. Commencing with a contract signed on December 2, 2015, Kisensum began customizing a microgrid controller for the site and integrating the unique assets on site. These assets included a utility grade ION meter, two second life battery packs (with IPC inverter behind the device), two BTC split unit charging stations, and an ABB solar inverter. With almost three quarters of the integration work complete, NRG expects to inspect and fully deploy these assets for public use in Q2 2016.

In addition to the technical integration done on site, the team took a sharp look at the results of the UC Berkeley model and continued to build on it. NRG wanted to create and generate results using real charging profile data and commercial figures to evaluate what the effect of storage would be. We evaluated the highest peaks and considered what the appropriate capacity and duration of a battery should be to optimize the performance of this charging station.

Subsequent Quarter Activities

In the next quarter, Q2 of 2016, NRG will finalize the integration and deployment of assets in Phase II. The full battery storage system and split unit charging stations will be delivered and installed on site. Additional sites off-campus will be evaluated for deployment of Phase III.

For further details, see confidential [Appendix D-1](#).

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEV) and six Nissan LEAF Plug-in electric vehicles (PEV). The four primary goals of EVSA are:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology,
- Advance product readiness for bidirectional inverters, including listing standards and product certification
- Identify use cases for V2G and test vehicles against those use cases.
- Inform public policy around the system, ratepayer and customer benefits of V2G.

Previous Quarter Activities

The first quarter of 2016 was a planning quarter for the EVSA project with efforts focused on developing use case scenarios for testing and designing the remaining 7 of 9 charging station installations. A notable accomplishment was the establishment of a California VGI Stakeholder Working Group which began meeting in February. This group formed out of a CPUC suggestion

for cross collaboration and discussion amongst the multiple VGI project happening under the CEC purview and those with utility or commercial support.

Subsequent Quarter Activities

Building off of the progress made in Q1 2016, NRG will permit and install additional charging stations for the electric vehicles in the demonstration. The team will continue to work on developing use cases for the project and holding stakeholder meetings to gather input and feedback to the project process.

For further details, see confidential [Appendix D-2](#).

Extreme High Power DC Charging Station

Project Summary

Automakers are increasing range of EVs by increasing battery capacity in the near future. To maintain a consistent customer/EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure must increase the power dispensing. This project is intended to bring auto OEMs, EVSE and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind EVSE infrastructure capable of high power (300 + amps) of VDC power to EVSEs on site
- Test with auto OEMs and EVSE providers to allow for test bed and development of standards

Previous Quarter Activities

In Q1 2016, NRG in coordination with the auto OEMs has progressed the conversation for the infrastructure needed for the next 4 years (thru 2020) and beyond. NRG expects to finalize contracts with EVSE and hardware manufacturers for production of technology needed for this development and future production hardware in early Q2. Technical meetings have continued and station design specifications are being developed for expandability and flexibility. NRG is also working with auto OEMs regarding testing capability and timing for EV availability. Station and equipment engineering/design is expected to be complete in Q2 with permitting and manufacturing to follow.

EV OPPORTUNITY PROJECTS

A proposal to Air Resource Board for Opportunity Access funding to deploy and demonstrate electric school buses, including job training and infrastructure installation is still pending. This project application was previously reported to CPUC and there are no updates in the current report. Additionally, NRG is currently in talks with Los Angeles County, Greenlining Institute, Valley LEAP and others to develop proposals that would allocate remaining funds to qualified projects.

Appendix A

Freedom Station Table

See attached.

APPENDIX A - Freedom Station Detail

Dated as of: March 5, 2016

<u>Name</u>	<u>Street Address</u>	<u>City</u>	<u>Completion Date</u>	<u>PUMA</u>
