

**Settlement Year 4 – Fourth Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project**

*For the period September 6, 2016 through December 5, 2016 (the Reporting Period)
Submitted January 5, 2017 by NRG Energy, Inc. on behalf of the Dynegy Parties¹*

EXECUTIVE SUMMARY

As previously reported, NRG Energy, Inc. (NRG) continues to execute its obligations under the Agreement through EVgo Services LLC (EVgo).

As of December 5, 2016 (the Reporting Date), EVgo had a total of 176 Freedom Station sites either constructed or under development. During the Reporting Period, EVgo completed construction on 36 additional Freedom Station installations, for a total of 161 completed sites. **Under the Agreement, the completion of at least 160 Freedom Stations by December 5, 2016 extends the permitted installation period through December 5, 2017 for the 200 obligated Freedom Stations.**

35 out of the 161 Freedom Station sites (22 percent) are located in qualified low-income areas (PUMAs), exceeding the 20% commitment, and serving a broad demographic range at places they prefer to shop, meet and play locally, such as grocery stores, shopping centers and malls.

Freedom Stations are open for any electric vehicle and offer multiple forms of payment, including credit card. All stations support both the CHAdEMO and SAE CCS fast charging standards, and credit card swipe readers have been installed at all sites.

Utilization of the public charging infrastructure continues to increase. 120,175 fast charging sessions were reported in the quarter. Together, these sessions consumed 1,169,465 kWh of electricity

Overall, EVgo has 593 Make-Readies Sites under contract, representing 4,986 Make-Ready Stubs. Of these, 3,321 Make-Ready Stubs have been installed at 382 sites.

All Technology Demonstration funds have been allocated, and the three projects are underway, with specific projects updates provided below. Opportunity Access programs have been submitted to CPUC staff for consideration and approval.

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 176 Freedom Station sites were either completed, under construction, or in the permitting process.

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the “Agreement”).

The table below summarizes Freedom Station progress throughout the term of the Agreement:

<i>DC Fast Charging Station Progress</i>	Year- End 2013	Year- End 2014	Year- End 2015	2016			
				Q1	Q2	Q3	Q4
Sites with Permits Submitted	22	17	3	8	5	12	5
Sites with Permits Approved	3	17	7	5	7	11	2
Sites under Construction	5	16	11	8	10	20	8
Sites Completed	10	56	105	113	118	125	161
Completed Sites w/ SAE Combo		23	105	113	118	125	161
Completed Sites w/ working credit card readers		3	105	113	118	125	161
Completed sites with credit card readers and SAE combo		2	105	113	118	125	161
Cumulative Settlement Target	40	100	160				200

Installations

During the Reporting Period, EVgo completed construction on 36 additional Freedom Stations, for a total of 161 Freedom Stations. Completed Freedom Stations are listed in Appendix A, with new stations **in bold**.

The Agreement requires a minimum number of Freedom Stations in each of four geographic regions. The table below summarizes the geographic distribution requirements and progress as of the Reporting Date.

<i>Geography</i>	Required	Completed	Percentage	Remaining Requirement
LA Basin	110	73	66%	37
SF Bay Area	55	59	107%	Complete
San Joaquin Valley	15	15	100%	Complete
San Diego County	20	14	70%	6
Total:	200	161	80.5%	43

As seen in the preceding table, the Minimum Freedom Station Count has been fully met or exceeded in the SF Bay Area and the San Joaquin Valley. Current exceedances will contribute to meeting requirements of the anticipated Freedom Station Savings event, as noted below.

Site Development

As of the Reporting Date, 8 additional Freedom Station sites were under construction, 2 more were fully permitted and another 5 sites had been submitted for permitting.

Based on current projections, EVgo anticipates having a Freedom Station Savings Event (as such term is defined in the Agreement), and has begun site planning, development, construction and operation of additional Freedom Station sites and/or expanded capacity as required.

Low-Income PUMA Distribution

Thirty-five of the 161 Freedom Stations are located in low-income PUMAs: 15 in the San Francisco Bay Area, 12 in the Los Angeles Basin, 4 in San Diego County, and 4 in the San Joaquin Valley. They represent nearly 22% of all operational sites, exceeding the goal of 20% in this category.

Assessing Freedom Station distribution by income classification of PUMAs is a device that CPUC and NRG developed for the settlement agreement because no other standards existed at the time. Since then, the Office of Environmental Health Hazard Assessment (OEHHA), on behalf of the California Environmental Protection Agency (CalEPA), developed the California Communities Environmental Health Screening Tool. CalEnviroScreen is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. CalEPA has used the tool to designate California communities as disadvantaged pursuant to Senate Bill 535.

Applying CalEnviroScreen to the Freedom Station distribution for information purposes, as requested by CPUC, shows the same number of qualifying sites (35 out of 161), but with a slightly different distribution than the PUMA communities. The results are presented in the table below. NRG and EVgo will continue to assess the distribution by this standard in coming reports to align the state’s environmental justice standards with the settlement infrastructure.

	Operational Sites	PUMA	CalEnviro Screen
LA	73	12	15
SF	59	15	13
SD	14	4	3
SJV	15	4	4
CA- all	161	35 (21.7%)	35 (21.7%)

SAE Combo Rollout Complete

All Freedom Stations support both the SAE combo (CCS) and the CHAdeMo connector standards. This fleet of CCS chargers represents the largest known deployment in the world.

Credit Card Payment Upgrades Complete

All Freedom Stations and all chargers at Freedom Stations are able to accept credit cards via a swipe-card reader. Additional payment mechanisms include RFID cards for EVgo, EZ Charge, BMW ChargeNow, Kia Charge Up. EZ Charge and Kia Charge Up cards are compatible with chargers networked by EVgo, Greenlots, Blink and AeroVironment. BMW ChargeNow cards also access chargers networked by Chargepoint. Additionally, all EVgo stations are accessible via phone center with customer service phone numbers printed on the stations.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, EVgo has 593 Make-Readies Sites under contract, representing 4,986 Make-Ready Stubs. Of these, 3,321 Make-Ready Stubs have been installed at 382 sites, as set forth in [Appendix B](#).

Progress continues to be made in Make-Readies distribution, and the pace of deployment has increased each year since inception. Although the 2016 pace is the best since inception, completion of the settlement obligation will require additional time. NRG and EVgo continue to work in good faith toward meeting the obligation and extending the settlement installation timeline in recognition of the success to date.

NRG and EVgo have had particular success reaching disadvantaged communities with this program. For information purposes, CPUC staff requested an analysis of distribution based on the Cal Enviro Screen (CES) standard, which did not exist at the time the settlement was enacted. The distribution is reported in the chart below.

Distribution of Make-Readies by California Enviro-Screen Criteria

	CES Qualified Sites			Percent of total sites			CES Qualified Stubs		Percent of total stubs		
	MDU	WP	All	MDU	WP	All	MDU	WP	MDU	WP	All
LA	8	22	30	12.3%	29.7%	21.6%	85	153	18.9%	26.4%	23.1%
SF	4	18	22	6.0%	28.6%	16.9%	44	188	5.9%	35.7%	18.2%
SD	9	4	13	15.2%	14.3%	14.9%	76	30	15.9%	12.6%	14.8%
SJV	0	1	1	0.0%	11.1%	9.1%	0	10	0.0%	12.4%	9.7%
Total	21	45	66	10.9%	25.9%	18.0%	205	381	12.1%	26.7%	18.8%

Another way to consider make-readies distribution to disadvantaged communities or residents is to consider the percentage of multifamily properties (and stubs) that have deed-restricted housing units. By this standard, the results look more beneficial. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm. Thus, residents of low-income housing units as measured by the median income in the region have reasonable access to the stubs built in this program.

	Deed Restricted Sites	Percent of total operational MDU sites	Deed Restricted Stubs	Percent of total operational MDU stubs
LA	18	27.7%	127	28.2%
SF	14	20.9%	178	23.8%
SD	15	25.4%	100	20.9%
SJV	0	0.00%	0	0.00%
CA- All	47	24.4%	405	23.8%

Pursuant to Section 4(b)(vi)(B) of the Agreement, NRG has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <http://www.evgo.com/california-rev-progress/>.

USAGE DATA

EVgo completed 120,175 fast-charging sessions in the Reporting Period at Freedom Station sites and dispensed over 1,169,465 kilowatt-hours of electricity.

This translates to over 3.5 million miles driven on electricity in this quarter, displacing 117,000 gallons of gasoline (assuming 3 miles per kWh and 30 mpg).

Confidential Appendix C, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately in electronic format.

TECHNOLOGY DEMONSTRATION PROGRAMS

Stationary Storage Plus Electric Charging (SSPEC)

Project Summary

The Stationary Storage Plus Electric Charging (or SSPEC) project will investigate how incorporating stationary batteries with DC Level 3 electric vehicle (EV) charging infrastructure can reduce the cost of developing, constructing, and operating public Fast Chargers without the use of incentives. The project will do this by:

1. Deploying a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and control technology.
2. Running a number of tests with various configurations of devices at the SSPEC site.
3. Analyzing results from the SSPEC site and historical data from EVgo's charging station network to identify load profiles, deployment sites, and utility territories which can benefit most from backup batteries and/or generation on site.

Upon successful economic and operational demonstration, NRG intends to commercialize these technologies and integrate them into its broader Freedom Station rollout. Ultimately, NRG believes that SSPEC will enable faster deployment of DC Fast Chargers by both EVgo and third parties at a wider variety of locations, and for a lower total cost of ownership to property owners and electric vehicle service providers alike.

Current Quarter Activities

Q4 2016 made significant technical progress towards the reliability of the integrated system at UCSD's SSPEC site. Through the beginning of December, the site was experiencing intermittent outages and equipment faulting. A detailed power analysis was conducted on site which identified the ALMS and inverter to be at the root cause of these challenges. Corrective actions were taken by the respective manufacturers and the site has seen dramatic improvements.

The SSPEC project is now well into Phase III of the program, working with battery system integrators and site host to deploy additional energy storage systems in the EVgo network. A short list of sites has been identified and EVgo is in active conversations with the host. All sites for the Phase III implementation will be retrofits.

Additionally, two studies were commissioned for the SSPEC project. 1) to determine the benefits of a solar canopy at charging stations, and 2) to make an assessment of California market opportunities for DER aggregation. The solar study was completed in Q4 2016.

Subsequent Quarter Activities

In Q1 of 2017, EVgo will continue to develop Phase III plans, permitting and installing the energy storage systems at charging stations in the EVgo network. A report will be provided on the solar and storage studies which were conducted, as well as a report on the site controller operations.

For further details, see confidential [Appendix D-1](#).

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEV) and six Nissan LEAF Plug-in electric vehicles (PEV). The four primary goals of EVSA are:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology,
- Advance product readiness for bidirectional inverters, including listing standards and product certification
- Identify use cases for V2G and test vehicles against those use cases.
- Inform public policy around the system, ratepayer and customer benefits of V2G.

For a more detailed report on the scope of work and related activities, please refer to the *Final Scope of Work – October 2016*.

Current Quarter Activities

In the past quarter, three Princeton Power 10kW DC CHAdeMO V2G stations were permitted, installed and inspected. The installation of the other three stations were delayed due to UCSD pursuing an additional contract with EVgo to install 216 “make-ready” infrastructure systems at the sites in conjunction with EVgo’s Ready for Electric Vehicles (REV) Program for California.

Honda delivered two of the three bi-directional Honda Accord PHEVs to UCSD and they are being stored in the P703 Parking lot at the intersection of Voigt Drive and Campus Point Road. One of these vehicles will be delivered to NREL for 8 weeks of testing and then be transported to

SDG&E for further testing. The six Nissan Leafs are ready to be purchased by EVgo, pending the finalization of the Driver Agreement.

The EVSA team has been working to finalize four contract agreements this past quarter: (1) Technology Demonstration Agreement with Honda, (2) Vehicle Loan Agreement with Honda, (3) Testing Collaboration Agreement with SDG&E, and (4) Driver Agreement with the Drivers from the UCSD community.

The EVSA team continued to plan and organize calls for the California VGI Stakeholder Working Group. In addition, the team participated in the Vehicle-Grid Integration Standards Workshop on 12/7 and presented on the EVSA project at the California Multi-Agency Update on VGI on 12/12.

Subsequent Quarter Activities

All six Princeton Power stations will complete installation by the end of January 2017 at which time they will receive a final Field Inspection. In the meantime, the EVSA team will purchase six Nissan Leafs, accept delivery of the third Honda PHEV to the UCSD campus and will finalize and sign all pending contract agreements. In addition, the team will work with UCSD to select and onboard all nine program participants.

For further details, see confidential [Appendix D-2](#).

Extreme High Power DC Charging Station

Project Summary

Automakers are increasing range of EVs by increasing battery capacity in the near future. To maintain a consistent customer/EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure must increase the power dispensing. This project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind EVSE infrastructure capable of high power (300 + amps) of VDC power to EVSEs on site
- Test with auto OEMs and EVSE providers to allow for test bed and development of standards

Current Quarter Activities

EVgo has received delivery of prototype 150 kW EVSE from ABB. This EVSE is capable of charging vehicles with an operating voltage range from 200-900+ VDC. This charger will also be backwards compatible with EVs of today (50kW). This equipment will be used as a test bed for possible compliant and standard questions and examples and be used as a platform for the next steps in high power charging equipment. EVgo has secured and is in development of a high power charging station at the World's Tallest Thermometer in Baker, California. Utility design is underway and this site will be an example of what the future of DC charging will be.

EV OPPORTUNITY PROJECTS

The EV Opportunity Program under the Agreement consists of \$4 million toward “...Enhancing the appreciation of the social benefits of electric vehicles and creating opportunities for residents of under-served communities to benefit from expanded use of electric vehicles.” More specifically, the EV Opportunity Program Amount may be used to fund: a) the deployment of electric vehicle charging infrastructure to support electric vehicle car-sharing projects, in particular in low-income areas within the State of California, b) an EV job training program and c) other projects consistent with the objectives of Section 4(d)(ii) of the Agreement.

In Q4 of 2016, EVgo submitted two proposals for the CPUC’s review. The first was the *Green Raiteros Pilot Project* in partnership with the San Joaquin Valley Latino Environmental Advancement Project (Valley LEAP) and the Fresno County Rural Transit Authority (FCRTA), the Shared Use Mobility Center (SUMC), and West Hills Community College. The Green Raiteros Pilot will build on an existing, grassroots ridesharing program – the *Raiteros* – and will help expand access to carbon-free mobility in the Central Valley by strategically and sustainably introducing EVs to the Raiteros’ services. EVgo also worked with Valley LEAP to apply for the 11th Hour Project Just Transit Challenge, a fund dedicated to reduce emissions while increasing equitable transportation options. If awarded, this funding opportunity will be used to acquire two 2017 Chevy Bolt’s for the *Green Raiteros Pilot Program*.

The second proposal submitted was *Electric Access Charging Hub (EACH) Program*. In an effort to create EV access and job opportunities to underserved communities, EVgo will develop seven EV-charging hubs in low-income communities of the San Francisco Bay Area, Los Angeles, and San Diego. To that end, EVgo will provide charging depots for ride sourcing (i.e., Uber or Lyft) and car sharing services (i.e., Zipcar or Carma City Car Share) in low income areas. The EACH project aims to support EV ride sourcing/carsharing business models, create job opportunities, provide publicly available EV Fast Charging, and spur the adoption of electric vehicles in underserved neighborhoods.

The proposal for both applications is pending approval of CPUC staff.

Appendix A

Freedom Station Table

See attached.

APPENDIX A - Freedom Station Detail**Dated as of: December 5, 2016**

<u>Name</u>	<u>Street Address</u>	<u>City</u>	<u>Region</u>	<u>Completion Date</u>	<u>PUMA</u>	<u>CES</u>
SF Bay Area						
1 Westlake Shopping Center	75 Southgate Ave.	Daly City	SF Bay Area	6/24/2013		x
2 Whole Foods Fremont	3111 Mowry Ave.	Fremont	SF Bay Area	9/25/2013
