### Settlement Year 7 – First Quarter Progress Report to California Public Utilities Commission Electric Vehicle Charging Station Project

For the period December 6, 2018 through March 5, 2019 (the Reporting Period) Submitted April 5, 2019 by NRG Energy, Inc. on behalf of the Dynegy Parties<sup>1</sup>

#### **EXECUTIVE SUMMARY**

NRG and EVgo continue to implement the 2012 settlement agreement (the Agreement) between the California Public Utilities Commission (CPUC) and certain NRG-affiliated entities to deploy electric vehicle charging infrastructure across the state. While NRG remains the obligated party, EVgo is executing the implementation of the Agreement as a service provider. The program has spurred a growing EV ecosystem that likely would not have been possible without this partnership.

EVgo has already exceeded the settlement's minimum Freedom Station target of 200 with a total of 206 completed Freedom Stations. EVgo continues to develop stations to fulfill the geographic and low-income targets in the Los Angeles basin and San Diego County. By June 5, EVgo projects completing a total of 217 Freedom Stations for the same budget; these 17 incremental builds will be part of the Savings Event (as defined in the Agreement).

In this quarter, EVgo customers completed 324,617 fast-charging sessions at Freedom Station sites, which dispensed over 4,927,000 kilowatt-hours of electricity. This translates to 15.39 million miles driven on electricity in this quarter, displacing 633,676 gallons of gasoline.<sup>2</sup>

EVgo made significant advances in the development of high-power charging plazas (HPCPs), with one completed station, eight under construction and a further ten in permitting; EVgo projects exceeding the target of ten plazas and completing as many as 15 plazas to serve the needs of residents of multi-family housing. In combination with the Freedom Stations Savings Event, EVgo anticipates installing 240 more Direct Current Fast Chargers (DCFCs) than originally contemplated under the Settlement within the scope of the original budget.

EVgo and NRG are on schedule to deliver the Make-Readies volumetric building requirement of 6,875 Make-Ready Stubs. EVgo has 789 Make-Ready Sites under contract, representing 6,881 Make-Ready Stubs. As of the Reporting Date, a total of 6,521 Make-Ready Stubs have been installed at 756 sites. EVgo has satisfied the public interest and workplace stub counts set forth in the Agreement. Stubs under contract and under construction will meet the regional distribution targets.

<sup>&</sup>lt;sup>1</sup> Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the "Agreement").

<sup>&</sup>lt;sup>2</sup> 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<a href="http://www.afdc.energy.gov/data/vehicles.html">http://www.afdc.energy.gov/data/vehicles.html</a>); MPGs based on 24.3 MPG CAFÉ Standard (<a href="http://www.afdc.energy.gov/vehicles/electric">http://www.afdc.energy.gov/vehicles/electric</a> emissions sources.html).

All Technology Demonstration funds have been allocated, and the three projects are underway. Specific updates for Technology and Opportunity Projects are provided in the corresponding section below.

NRG and EVgo continue to provide regular updates to the CPUC on challenges and improvements as the buildout continues. NRG and EVgo thank the Commissioners and the staff for their shared commitment to building out public charging infrastructure to expand access to EV adoption for more Californians across geographies and demographics.

#### INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, a total of 217 Freedom Station sites were either completed, under construction, or in development. EVgo has already exceeded the settlement's minimum Freedom Station target of 200 with a total of 206 completed Freedom Stations. EVgo continues to develop stations to fulfill the geographic targets in the Los Angeles basin and San Diego County. EVgo projects completing a total of 217 Freedom Stations with 417 50 kW DCFC for the same budget; these 17 incremental builds will be part of the Savings Event (as defined in the Agreement).

During this Reporting Period, EVgo energized one Freedom station and completed three additional Freedom Stations in the LA basin for a total of 206 completed installations. Eight more stations were under construction with the remaining three sites in permitting and engineering design. The stations in construction and design will meet the geographic and low-income Public Use Microdata Areas (PUMAs) distribution set forth in the Agreement.

The table below summarizes Freedom Station progress throughout the term of the Agreement:

DC Fast Charging	Year-	Year-	Year-	Year-	Year-	Year-	2019
Station Progress	End 2013	End 2014	End 2015	End 2016	End 2017	End 2018	Q1
Sites under Construction	5	16	11	8	0	5	8
Sites Completed	10	56	105	161	200	204	206*
Completed Sites w/ SAE Combo (CCS)		23	105	161	200	204	206
Completed Sites w/ working credit card readers		3	105	161	200	204	206
Completed sites with credit card readers and SAE combo (CCS)		2	105	161	200	204	206
Cumulative Settlement Target	40	100	160	200	200	204	206

<sup>\*</sup> A highly utilized Freedom station was converted to a high-power charging plaza and is no longer reported as a Freedom Station.

Completed Freedom Stations as of the Reporting Date are listed in Appendix A.

#### Station Distribution

The Agreement requires a minimum number of Freedom Stations in each of four geographic regions. The Freedom Station distribution targets have been fully met or exceeded in the SF Bay

Area and the San Joaquin Valley. The completed stations in the SF Bay Area will contribute to the Savings Event as defined by the Agreement. The table below summarizes the geographic distribution requirements and progress on completed stations as of the Reporting Date.

Geography	Required	Completed	Percentage	Remaining Requirement
LA Basin	110	100	91%	10
SF Bay Area	55	69	125%	Complete
San Joaquin Valley	15	15	100%	Complete
San Diego County	20	19	95%	1
Other PG&E	_	3	_	_
Counties				
Total:	200	206	103%	11

EVgo continues to develop sites to meet the geographic targets. The table below summarizes the construction progress as of the Reporting Date. During the Reporting Period, a contracting issue arose in the final San Diego Freedom Station but EVgo expects this to be resolved in the coming weeks.

Geography	Remaining Requirement	Engineering	Permitting	Construction
LA Basin	10	1	1	8
SF Bay Area	Complete			
San Joaquin Valley	Complete			
San Diego County	1		1	
Other PG&E Counties	-			
Total:	11			

#### Low-Income PUMA Distribution

Forty-two Freedom Stations are in low-income PUMAs: 16 in the San Francisco Bay Area, 19 in the Los Angeles Basin, 4 in San Diego County, and 4 in the San Joaquin Valley. They represent 22% of all operational sites, exceeding the goal of 20% in this category. The three remaining low-income PUMA sites in the LA Basin are in construction as of the reporting date.

The table below summarizes the low-income PUMA distribution and progress as of the reporting date.

Geography	Build Obligation	PUMA Minimum Requirement	Operational PUMA	PUMA %
LA Basin	110	22	19	17%
SF Bay Area	55	11	15	27%
San Joaquin Valley	15	3	4	27%
San Diego County	20	4	4	20%
Other Counties	-	-	-	-
CA- all	200	40	42	21%

Assessing Freedom Station distribution by income classification of PUMAs is a device that the CPUC and NRG developed for the settlement agreement because no other standards existed at the time. Since then, the Office of Environmental Health Hazard Assessment (OEHHA), on behalf of the California Environmental Protection Agency (CalEPA), developed the California Communities Environmental Health Screening Tool. This tool is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. CalEPA has used the tool to designate California communities as disadvantaged pursuant to Senate Bill 535<sup>3</sup>. While not a requirement of the settlement, when measured against this metric, EVgo has installed 40 out of 206, or 19% of Freedom Stations in disadvantaged communities

#### INSTALLATION OF HIGH-POWER CHARGING PLAZAS (HPCPS)

As part of the Second Amendment to the Long-Term Contract Settlement, NRG and EVgo are committed to building ten (10) or more high-power charging plazas to serve the charging needs of residents of multi-family housing.

These charging plazas will meet the following criteria:

- At least three (3) 50kW (or higher) DC Fast Chargers
- Support both the CHAdeMO and SAE Standards
- Located in the top 50% of California Public Use Microdata Areas (PUMAs) ranked by percentage of residents in multi-family housing
- Distributed with a goal to serve drivers throughout the State of California, including in both Northern and Southern California
- These stations shall be distributed throughout the State of California, including 20% of stations installed in qualified low-income areas (by income-ranked PUMA)

EVgo has executed site host agreements for twenty-one (22) high power charging plazas. During the Reporting Period, EVgo energized one high-power charging plaza in the SF Bay Area. Eight sites were under construction as of the reporting date with the remaining 13 sites in permitting and engineering design. Many of these plazas will exceed the minimum charger count and power levels.

DC Fast Charging	Year-	2019
Station Progress	End 2018	Q1
Sites under Construction	5	8
Sites Completed	0	1
Completed Sites w/ SAE Combo		
(CCS)	0	1
Completed Sites w/ working		
credit card readers	0	1
Completed sites with credit card		
readers and SAE combo (CCS)	0	1
Cumulative Settlement Target	10	10

<sup>&</sup>lt;sup>3</sup> CalEnviroScreen 2.0 data (October 2014) has been applied to calculate this metric.

#### Station Distribution

The table below summarizes the geographic distribution and progress as of the Reporting Date. The geographic distribution of HPCP is aimed to serve drivers and residents of multi-family housing throughout the State of California, including in both Northern and Southern California.

Geography	Requirement	Executed Contracts	Engineering	Permitting	Construction	Complete
LA Basin	-	7	1	2	4	-
SF Bay Area	-	9	1	5	3	1
San Joaquin Valley	-	1	-	-	-	-
San Diego County	-	4	-	3	-	-
Other PG&E Counties	-	1	-	-	1	-
Total:	10	21	2	10	8	1

#### Low-Income PUMA Distribution

Four of the HPCP sites under contract are located within a low-income PUMA, one of which is the completed install.

Completed HPCP as of the Reporting Date are listed in Appendix A.

#### **INSTALLATION OF ENERGY STORAGE**

As part of the Second Amendment to the Long-Term Contract Settlement, NRG and EVgo can spend up to \$2.5 million towards the procurement and installation of batteries and related storage equipment.

EVgo has been building a commercial energy storage program, building upon the work started in the Stationary Storage Plus Electric Charging (SSPEC) technology demonstration project. EVgo has already successfully installed second life batteries at Union City and Baker, California, as part of the SSPEC project. In Q1 2019, EVgo completed installation of two battery systems at Freedom Stations. Additional sites with battery systems are in design and permitting for install at high power charging plazas.

#### INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

Overall, EVgo has 789 Make-Ready Sites under contract as of the end of this reporting period, representing 6,881 Make-Ready Stubs. This build will exceed the minimum requirement of 6,875 Make-Ready Stubs required by the settlement. As of the Reporting Date, a total of 6,521 Make-Ready Stubs have been installed at 756 sites.

The table below summarizes the geographic distribution and progress as of the Reporting Date. EVgo has satisfied the public interest and workplace stub counts set forth in the Agreement. Stubs under contract and under construction will meet the regional distribution targets.

Geography	%	<b>Build Obligation</b>	Completed	Remaining
LA Basin	55%	2,269	2,341	-
SF Bay Area	27.5%	1,134	2,485	-
San Joaquin Valley	7.5%	309	299	10
San Diego County	10%	413	1,396	-
Total	60% of 6,875 OR 4,125	6,875	6,521	354

Make Readies	% of total	<b>Build Obligation</b>	Completed	Remaining
Workplace	15%	1031	2860	-
Public Interest	10%	688	734	-

Completed Make Readies as of the Reporting Date are listed in Appendix B.

Distribution of Make-Readies by CalEnviroScreen Criteria

NRG and EVgo have had some success in reaching disadvantaged communities with this program. For information purposes, CPUC staff requested an analysis of distribution based on the CalEnviroScreen (CES) standard, which did not exist at the time the settlement was enacted. The distribution is reported in the table below.

		Qualif Sites	ried	Percent of total sites				CES Qualified Stubs		nt of total	stubs	
	1	Sites				•		Stubs			ı	
Region	MDU	WP	All	MDU	WP	All	MDU	WP	All	MDU	WP	All
LA	48	33	82	33.1%	21.6%	26.6%	266	246	516	26.2%	19.7%	22.0%
SD	14	12	27	19.4%	18.5%	17.2%	133	111	252	21.1%	19.4%	18.1%
SF	7	20	37	5.7%	22.2%	13.8%	73	208	356	5.8%	26.7%	14.3%
SJV	ı	12	12	0.0%	41.4%	37.5%	ı	112	112	0.0%	42.6%	37.5%
Total	69	77	158	20.1%	22.8%	20.6%	472	677	1236	16.1%	23.7%	19.0%

Another way to consider make-readies distribution to disadvantaged communities or residents is to consider the percentage of multi-dwelling unit (MDU) properties (and stubs) that have deed-restricted housing units. By this standard, the results benefit disadvantage communities at 31.1% of total operational MDU stubs. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm. Thus, residents of low-income housing units as measured by the median income in the region have reasonable access to the stubs built in this program. That being said, NRG and EVgo have found that a large number of low-income Californians do not have access to regular off-street parking; accordingly, public fast charging remains a critical priority for expanding EV access across demographics.

		Percent of Total		Percent of Total
	Deed Restricted	Operational MDU	Deed Restricted	Operational MDU
	Sites	Sites	Stubs	Stubs
LA	78	53.8%	523	51.6%
SD	17	23.6%	117	18.6%
SF	21	17.1%	270	21.6%
SJV	0	0.0%	0	0.0%
CA - All	116	33.8%	910	31.1%

Pursuant to Section 4(b)(vi)(B) of the Agreement, EVgo has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <a href="http://www.evgo.com/california-rev-progress/">http://www.evgo.com/california-rev-progress/</a>.

#### **USAGE DATA**

EVgo customers completed 324,617 fast-charging sessions in the Reporting Period at Freedom Station sites, which dispensed over 4,927,000 kilowatt-hours of electricity.

This translates to 15.39 million miles electric miles driven in this quarter alone, displacing 633,676 gallons of gasoline (assuming 3.125 miles per kWh and 24.3 mpg).<sup>4</sup> Accordingly, EVgo Freedom Station sites avoided 3,495.42 MT of CO<sub>2</sub>.

Confidential <u>Appendix C</u>, the original raw usage data for the Reporting Period, will be submitted to the CPUC separately in electronic format.

<sup>&</sup>lt;sup>4</sup> 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<a href="http://www.afdc.energy.gov/data/vehicles.html">http://www.afdc.energy.gov/data/vehicles.html</a>); MPGs based on 24.3 MPG CAFÉ Standard (<a href="http://www.afdc.energy.gov/vehicles/electric emissions sources.html">http://www.afdc.energy.gov/vehicles/electric emissions sources.html</a>).

#### **Stationary Storage Plus Electric Charging (SSPEC)**

#### Project Background

The Stationary Storage Plus Electric Charging (SSPEC) project uses stationary batteries in a technology demonstration application to reduce the cost of operating DC fast chargers (Level 3) and alleviate strain on the grid.

#### The SSPEC project has successfully:

- 1. Deployed a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and site control technology
- 2. Tested various configurations of distributed energy resources and electric vehicle DC fast chargers
- 3. Analyzed results from operation of the SSPEC site and historical data from EVgo's charging station network to identify load profiles, potential sites, and utility territories which can benefit most from stationary storage and/or generation on site

EVgo has started to commercialize these technologies and integrated them into its broader DC fast charger network. For example, following the initial learnings from the installation at the EVgo University of California-San Diego site, EVgo has also deployed energy storage at its Union City location as well as at Baker. Stations deployed with stationary storage can mitigate demand chargers and potentially have a lower total cost of ownership to property owners and electric vehicle service providers (EVSPs) alike.

#### Q1 2019 Activities:

- Successful commissioning of 2<sup>nd</sup> and 3<sup>rd</sup> BMW Second Life Battery systems at EVgo high-power charging station in Baker, CA.
- Interconnection agreement signed with Southern California Edison

#### Q2 2019 Upcoming Activities:

- Deploy OCPP 1.6 on BTC chargers at UCSD and implement new dynamic site demand cap functionality → delayed a quarter due to 1.6 release.
- Turn on fourth charger at SSPEC site → contingent upon chargers being upgraded to OCPP 1.6
- Perform research on operational data sets from second-life energy storage systems at SSPEC site, Union City, and Baker DC fast charging stations.
- Update call with UL on 1974 standard development.

For further details, see confidential Appendix D-1.

#### **EV Storage Accelerator (EVSA)**

#### Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low-cost energy storage resource. The project will use nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEVs) and six Nissan LEAF battery electric vehicles (BEVs). The four primary goals of EVSA are to:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology
- Advance product readiness for bidirectional inverters, including listing standards and product certification
- Identify use cases for V2G and test vehicles against those use cases
- Inform public policy around the system, ratepayer, and customer benefits of V2G

#### Q1 2019 Activities:

*Use Cases:* The EVSA Project Team has completed two of the four outlined project use cases. The final report for the second use case, Transformer Upgrade Deferral, was released March 20, 2019 and can be found here.

Use Case #3, Emergency Power Back-Up: The Project Team received a proposal from Baker Electric, an electrical subcontractor, to island one of the Princeton Power CA-10s installed at UCSD and to connect it to a load bank to simulate a residential load in the case of power interruption. The proposal is currently under review. Progress was also made on the analysis portion of this use case. By leveraging an existing analytical framework, the UCSD Project Team quantified the average interruption cost during a power outage met by 1 EV (30 kWh battery capacity) as \$125/year in a commercial setting and \$20/year in a residential setting. These preliminary results are currently in the process of being drafted into a formal report for submission to stakeholders.

Use Case #4, Value of V2G: The main focus of Q1 2019 was to finish the two major interim project reports – (1) Interim Data Analysis Report Module and (2) Interim Report on Simulated Revenue from V2G. The Project Team worked closely with Energy and Environmental Economics (E3) to examine the project data for the revenue report and had several conversations with CAISO in order to ensure the analysis process was correct given the limitations of the study using a historical AGC signal for dispatch. Once E3 completed the analysis, the Project Team requested feedback from select stakeholders (EVgo, Honda, CAISO, Nuvve) in order to ensure the report was clear and concise prior to release to the broader group of project stakeholders. At the time of writing the report is still under edit to take into account feedback. The Interim Data Analysis Report Module is complementary to the revenue report and will be released simultaneously.

**Deliverables:** The Project Team submitted the following deliverables in confidential Appendix D-2 of the Q1 2019 quarterly report: (1) Charging Station Metrics Report. The following deliverables were due to the CPUC in January 2019 following the completion of Q4 2018 data collection at the end of December 2018. However, these deliverables were delayed due to additional analysis and review required for the revenue report. The three interim project deliverables will be submitted once the revenue report is finalized.

- Interim Report on Actual and Simulated Revenue from V2G
- Interim Data Analysis Report Module
- Interim Project Benefits Update

The Final Data Analysis Report Module will be submitted separately from the Q2 2019 quarterly report once data collection is completed at the end of June.

*Administrative:* The EVSA Project Team revised the Scope of Work for the EVSA project in Q3 2018 to conduct data collection until the end of Q2 2019, followed by final reporting completed in Q3 2019. Confirmation of the scope change will be determined within overall extension discussions between EVgo and the CPUC.

#### Q2 2019 Upcoming Activities:

Q2 2019 will focus on the completion of the deliverables listed above. Simultaneously, the implementation plan for the third use case, emergency power back up, will be finalized and executed and the related cost-benefit analysis will be completed. The Project Team will start to plan for the conclusion of the project operation and data collection on June 30, 2018, including site decommissioning, asset reallocation and final report planning.

For further details, see confidential Appendix D-2.

#### **Extreme High Power DC Charging Station**

#### Project Background

Automakers are continuing to increase range of EVs by increasing battery capacities, e.g. the late-2016 release of the all-electric Chevy Bolt with 238 miles of range and announcements of recently and soon-to-be-released vehicles of similar and longer range, e.g. the Hyundai Kona and new Nissan LEAF. Depending on the use case, e.g. along highway corridors, higher power levels of charging may be needed to deliver a satisfying customer experience. EVgo has already deployed a variety of DCFCs at different charging speeds and continues to monitor how the energy delivery rate interplays with customer needs. Despite the fact that no EV capable of taking 350kW charging is widely commercially available in the US today, automakers and others are interested in deploying and learning from 350kW systems

EVgo's Extreme High Power DC Charging Station Project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind electric vehicle supply equipment (EVSE) infrastructure capable of high-power DC charging (300+ amps).
- Test with auto original equipment manufacturers (OEMs) and EVSE providers to allow for test bed and development of standards.

#### Q1 2019 Activities

EVgo's high-power charging station in Baker, CA became fully operational in Q4 2018 with (2) ABB 50 kW chargers, (2) BTC 150 kW chargers, (1) ABB 175 kW charger, and (1) ABB 350 kW charger. Since the station has been operational EVgo has been closely monitoring the usage and operation of the high-power chargers at the site.

The charging station in Baker, California at the World's Tallest Thermometer is currently operational with all 6 chargers available to the public and a PlugShare score of 10 as of the writing of this quarterly update. As a useful guide for those visiting the station, the chargers can be identified by name labels near their screens:

Astrid: 50 kW (ABB) Niska: 50 kW (ABB) Chance: 150 kW (BTC) Ollie: 150 kW (BTC) Ivo: 175 kW (ABB) Janus: 350 kW (ABB)

Additional energy resources at EVgo's Baker charging station include a 20 kilowatt (kW) solar canopy and a 60 kW / 88 kilowatt-hour (kWh) energy storage system. The site has two energy storage systems and each energy storage system is rated at 30 kW / 44 kWh and is comprised of a Princeton Power 30 kW inverter with two 22 kWh BMW i3 second-life battery packs. EVgo

will be studying the value and performance of these additional energy resources at the site in conjunction with the Stationary Storage Plus Electric Charging (SSPEC) technology demonstration project.

Most of the Q1 2019 activity on the project was focused on integrating the second-life energy storage systems with the site and commissioning the systems to be ready for full operation. EVgo worked with project partners MaxGen Energy Services, Princeton Power Systems, and ChargePoint to bring the battery systems to full operation and has received a signed interconnection agreement with Southern California Edison as of 3/27/19.

Image 1: Two Princeton Power Pi32 Energy Storage Systems. Each energy storage system is rated at 30 kW / 44 kWh and utilizes two BMW i-3 22 kWh battery packs.

Image 2: Energy storage systems as seen from door of equipment enclosure.

EVgo has been provisionally operating the energy storage equipment for commissioning purposes and has observed satisfactory operation of all devices. The energy storage systems respond to site level demand readings based on how much power is being demanded by the charging equipment on site. Since the site has both energy storage and solar power EVgo can charge the batteries using solar power during the day.

Below is an example of the site using solar power to charge the battery systems. The way to read the graph below is that a negative "Meter Load" value means power is being exported back to the grid which is what would be expected midday in Baker, CA. Here we see the site hovering around a value of -10 kilowatt (kW) until around 13:15 when we see the red "Inverter Load" spike up to about 18 kW. The spike of the "Inverter Load" to a positive 18 kW value means the inverters are charging the batteries with 18 kW of power from solar and the grid.

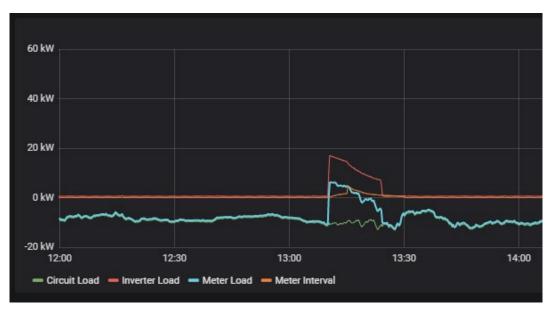

Image 3: Batteries charging with positive "Inverter Load" value.

The "Inverter Load" line with a positive value means power is traveling from the solar power array or the grid through the inverters to charge the batteries. A negative value for the "Inverter Load" corresponds to a discharge of energy stored in the batteries out through the inverters to provide power to the chargers on site – see below for an example of energy storage discharge.

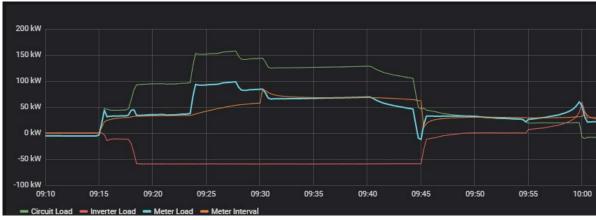

Image 4: Batteries discharging with negative "Inverter Load" value.

Upon further investigation the previous graph from March 25, 2019 (repeated here for reader's ease) is especially interesting because it shows a vehicle capable of charging at up to 150 kW. With further analysis of the charge curve we find that the vehicle charged for 45 minutes and received a total of 65 kWh for an average charge rate of 86 kW. In order to receive 65 kWh this vehicle presumably has a battery of at least 70 kWh but most likely more.

Vehicle type is not currently communicated through the electric vehicle supply equipment (EVSE) however we do know this charge happened on a combined charging standard (CCS) connector since the CHAdeMO connector only can charge up to 100 kW (500 Volts Direct Current @ 200 Amps).

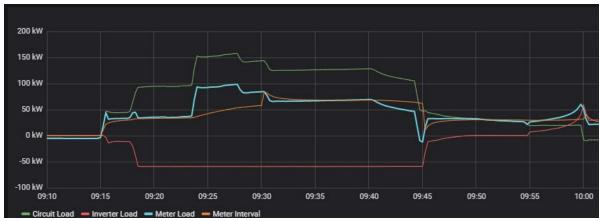

Image 4 (repeated): Vehicle is charging at 150 kW power level on high power charger at EVgo site.

EVgo will be setting up more controlled charger and vehicle testing now that the charging station is fully operational with all hardware in place. The goal of testing will be to determine the charge curves of different electric vehicle models on chargers of different power levels. This information on charge curves and charge times when combined with cost of different charge power levels will help inform policy makers and businesses when deciding what power level of chargers to invest in moving forward.

EVgo would like to thank the CPUC and project partners ABB, BTC, BMW, Princeton Power Systems, ChargePoint, and MaxGen Energy Services for their continued support of development and research toward more publicly available high-power charging. EVgo's Baker charging station with a variety of charging levels offers the perfect real-world test site for EV driver enthusiasts and OEM partners to test their vehicles charging capabilities. EVgo is excited to gather more charger/vehicle combination data sets in Q2 2019 to perform analysis and inform recommendations to industry stakeholders.

#### **EV OPPORTUNITY PROJECTS**

The EV Opportunity Program under the Agreement consists of \$4 million toward "...Enhancing the appreciation of the social benefits of electric vehicles and creating opportunities for residents of underserved communities to benefit from expanded use of electric vehicles." More specifically, the EV Opportunity Program Amount may be used to fund: a) the deployment of electric vehicle charging infrastructure to support electric vehicle car-sharing projects, in particular in low-income areas within the State of California; b) an EV job training program; and c) other projects consistent with the objectives of Section 4(d)(ii) of the Agreement.

The two approved Opportunity Programs, Green Raiteros and Equal Access Charging Hub (EACH), were established in 2017. Summaries of these programs, progress to date, and ongoing project schedules are included herein.

#### **Green Raiteros**

#### Project Background

The Green Raiteros Pilot Project is being executed in partnership with the San Joaquin Valley Latino Equity Advocacy & Policy Institute (the LEAP Institute), the Fresno County Rural Transit Authority (FCRTA), and the Shared Use Mobility Center (SUMC). The Green Raiteros Pilot builds on an existing grassroots ridesharing program comprised of retired Valley farmworkers—the *Raiteros*—who offer rides for people without access to transportation to and from work, medical appointments, or other needs. Green Raiteros expands access to carbon-free mobility—and given limited public transportation, sometimes any mobility at all—in the Central Valley by strategically and sustainably introducing EVs to the Raiteros' services.

#### Q1 2019 Activities

Following a record year of growth in 2018, the Green Raiteros program showed steady progress in the following areas:

#### Administrative:

Organizational and operational processes in Q1 2019 have continued to be put in place to transition GR to a self-supporting organization. Green Raiteros Program Manual and Green Raiteros Volunteer Driver Handbook have been developed and are undergoing final review. Key advisory members are working closely with staff to develop funding models for volunteer transportation programs that provide non-emergency medical transport. This will be key to securing contracts with clinics and other health care providers and rapidly increasing the volume of billable rides moving forward.

#### Staffing:

At the top of the year, Green Raiteros' first employee celebrated his first anniversary with the program. The LEAP Institute has hired three new part-time staff: Executive Assistant, Transportation Coordinator and LEAP Fellow. The Executive Assistant manages the administrative and human resource duties of the LEAP Institute. The Transportation Coordinator is assuming the management of all aspects of the Green Raiteros program & operations – client in-take, scheduling rides, working with volunteer drivers, and monitoring of EVSE and EV equipment. The LEAP fellow will lead various outreach & marketing efforts that will also include efforts to raise awareness of the Green Raiteros.

The staff has received guidance and training on managing major elements of the Green Raiteros program. Recently, the team attended the 3 Revolutions Conference at the Institute of Transportation Studies at UC Davis. Rey Leon was a featured speaker on Day 2 - Panel 4: The 3 Revolutions in Rural Communities. Staff were informed about and participated in discussions about the transportation revolution as impacted through sharing, automation, and electrification. The GR Director of Operations attended the CalSTART California 2030 conference that included panelist policy discussions about how to curb transportation GHG emissions.

".... Huron is going to be the city in the country with the most EV chargers per capita.....and the way I see it is - the river's got water now, now we need the canoes. And so I think that's a

challenge there, but with the Green Raiteros and the electric vehicles we do have, what we are trying to do is basically make Ambassadors, EV ambassadors of our folks who are who are mostly retired farmworkers, but also the staff will be those ambassadors to introduce the community, the families(of Huron) to electric vehicles and demystify whatever it is that must be demystified so that with our partnership with Beneficial State Foundation and others so that we can work so they can be able to afford a vehicle. Hopefully it's possible so that we can just beef up EV ownership."—Rey Leon

#### **Operations:**

With two electric vehicles in the network, Operations staff continue to recruit drivers and educate prospective drivers and the broader community on electric vehicle technology. Staff have attended over a dozen community events, public hearings and community engagements to advance awareness of the GR program. Including ongoing partnerships with volunteer feeder programs like Lideres Campesinas, an all-women organization that advance women's leadership and support.

#### Accomplishments

- Developed and currently implementing the Green Raiteros Volunteer Driver application & training.
- Volunteer Driver Trainings One training session in February, resulting in two new volunteer drivers.
- Client Medical Trips 55 completed trips and more scheduled
- Client list has over 40 community members
- Medical Trip distribution: Hanford (20), Fresno (25), Bakersfield (2), Lemoore (6) Madera (2)
- Clinic Research Operations staff compiled spreadsheets of facilities from trip database and existing GIS inventories across the GR service counties (Fresno, Kings, Tulare) in order to begin establishing contract relationships.

Trip Experience (Rider) – Lady, 60+ yr.., expressed how grateful she is of the service, as she does not own a car, does not have family that is available to take her to her appointments, and never learned how to drive. The closure of a medical facility in a neighboring town has impacted her directly and she now requires access to services that are much further away. At the end of the trip she was very relieved that Green Raiteros exists and that she doesn't have to worry herself and other people she cares about, about securing transportation.

**Trip Experience (Rider)** – Man, 60+ yr..., expressed how grateful he is for the service, as he cannot drive, and he has family in the area, but they are not available to provide transportation during the weekday. He said that his son has used a lot of sick-days at his place of employment to provide transportation for him to make his medical appointments. He is very appreciative and relieved that Green Raiteros is an available transportation option in the community.

**Trip Experience (Rider)** – man, 60+ yr. accompanied by his wife; both are intimidated by traveling into larger urban environments like Fresno or Hanford. He is very thankful for Green Raiteros because the couple has no car and no family members to turn to in the area. This lack of transportation makes it hard for him to schedule appointments, so the existence of Green Raiteros makes it possible for him to access the services he needs. On some trips they need a

little wayfinding assistance to locate the correct building for the appointment. They mentioned that every trip provided relieves a lot of stress for them in trying to find transportation and reach their medical appointment.

#### **Scheduling and Training Tools:**

SNAP the driver scheduling software now allows dispatch to collect rides and upload into the SNAP database directly (in addition to drivers adding trips manually) allowing drivers to have a download of their daily trips appear directly on their app every morning. The additional customizations that have been added to SNAP are Spanish translation and Safety Checklist. The latter upon opening will prompt the driver to go through a "safety checklist" for their vehicle asking them to check tires, brakes, headlights/taillights, windshield wipers, seatbelts, and confirm first aid kit on board. SNAP software support has been continuously responsive to the GR Ops team - helping to set up the software on Samsung Galaxy tablets that drivers have in the vehicle and making sure administrators have seamless access to the back-end web portal for ongoing database maintenance. SNAP has also offered additional training on their 2.0 version which will be available in June 2019. GR is still reconsidering full-deployment of SNAP as it is limited to only Android enabled devices, and not all drivers are comfortable with the interface.

#### **Electric Vehicles Charging:**

The newly opened Romualdo M. & Imelda C. Leon Community and Mobility Center has (10) installed operational Level 2 Electric Vehicle Charging stations open to the local Huron community and the EV driving public with extended office hours in downtown Huron, CA. The challenges with PGE have delayed the chargers being able to be on full amperage. The planned Level 3 install of (2) fast chargers in downtown Fresno has permits with the City of Fresno and is in PGE project queue.

#### Partnerships:

Many of the original partnerships and organizational relationships such as CEERT and Shared Use Mobility Center focused on incubating the Green Raiteros program have naturally relinquished or phased out while new partnerships have emerged. Mobility Development Partners, Purepecha Construction, Fresno State College Office of Community and Economic Development and Turn Key Trips a software company focused on volunteer transportation trip scheduling and dispatch are a few of the examples of relationships focusing on scaling up the Green Raiteros operation.

Green Raiteros continues to cultivate funders and financial institutions such as The California Endowment, Beneficial State Bank Foundation, The 11th Hour Project and San Joaquin Valley Air Resource Board to continue advancement of EV uptake and clean shared mobility networks. The Green Raiteros advisory group is focused on providing advice on the start-up tasks for the organization such as coordinating the service with other existing transit options and building relationships with clinics, medical facilities and other service related business and relationship development to continue to set Green Raiteros on a path to scale up to close gaps and add value to existing service providers through contracting and service agreements.

Green Raiteros has been instrumental in educating Huron community and surrounding rural communities regarding the Clean Vehicle Assistance Program, Beneficial State Bank (BSB)

Foundation's electric vehicle financing program whose goal is a path to EV ownership. The program has been so successful it is working on a securing a 2<sup>nd</sup> round of funding to disperse in late 2019. During the Green Raiteros Advisory Group Q1 meeting, the member from the Fresno County Department of Public Health (FCDPH) suggested that Green Raiteros conduct a pilot project. In this project Green Raiteros would be responsible to provide trips to a FCDPH client sub-group for medical appointments. FCDPH would like to consider Green Raiteros services as a potential cost-effective client transportation measure and use the pilot to consider capacity for Green Raiteros to provide additional future trips and for other programs.

Green Raiteros is currently preparing a draft proposal to submit to the Fresno County Public Health Department. As a result of conversations at the 3 Revolutions Conference, the Green Raiteros will be cultivating its relationship with ITS-Davis, as ITS-Davis expressed a need to partner with a community-based organization that can serve as an important conduit for components of their research activities, like outreach and surveys, about EVs and EV technology in a disadvantaged community. The LEAP Institute is in a great position to leverage existing resources to take the lead and achieve success and notoriety with such an effort. The Office of Community and Economic Development (OCED) at Fresno State University has elevated the marketing reach of the Green Raiteros program. OCED will contribute to the marketing project by coordinating the multi-cultural media outreach and marketing material development activities.

#### **Challenges:**

The adaptive re-use of a building nearly 50 years old extended the general contractor's efforts stabilizing the building, upgrading and in some case installing mechanical systems for the first time, retrofitting and upgrading electric service, conduit and wiring - all of which extended the project period by many months. Challenges related to PG&E scheduling for the new electric service continues to cause delays in providing the level of service to support the charging of more than 2 vehicles at a time. Operations staff completed remaining facility construction checklist in Q1 2019 to receive their certificate of occupancy from the City of Huron.

#### Q2 2019 Planned Activities

Green Raiteros in Q2 will completely wind down any remaining settlement funding and transition to a fully operational business. LEAP Institute leadership and the advisory committee will continue to oversee the Green Raiteros Program and its success to extend its range and reach and tripling of ridership and trained Raiteros drivers. Funded grant writers will continue to find new sources of funding for expansion in neighboring counties. The Office of Community and Economic Development (OCED) at Fresno State University will continue to elevate the marketing reach of the Green Raiteros program by offering marketing assistance through Ad and PSA campaigns tailored to Spanish language radio and television in the Valley as well as in local circulars and publications.

#### **EACH**

#### Project Background

The focus of the Electric Access Charging Hub (EACH) project is to create EV access and job opportunities in underserved communities. EVgo is developing seven EV-charging hubs in diasadvantaged communities of the San Francisco Bay Area, Los Angeles, and San Diego that will serve the public as well as electric carshare and rideshare vehicles. The EACH project aims to support EV carsharing and ridesharing, create job opportunities, provide publicly available EV fast charging, and spur the adoption of electric vehicles in underserved neighborhoods.

#### Q1 2019 Activities

EVgo energized the first EACH hub at the Brookhurst Community Center in the City of Anaheim in February 2019.

Brookhurst Community Center, 2271 Crescent Avenue, Anaheim

Completed EACH sites as of the Reporting Date are listed in Appendix A.

Additional hubs are in various stages of permitting, construction and energization:

- Construction is underway at three hubs,
- Permitting underway at two hubs
- One site is complete pending utility connection.

Region	Required	Distribution	Permitting	Construction	Complete
LA	-	3		2	1
SD	-	1	1		
SF	-	3	1	1	1
Total	7	7	2	3	2

#### Marketing, Outreach and Education:

In 2018, EVgo contracted the Citizen Group to lead the marketing and outreach component of the EACH program. The team continued to work closely to flush out Citizen's campaign outline

that will include community-based events and collaboration with the community-based organizations. Calendaring of the hub opening events are occurring in consideration with a hub's projected commissioning/energization schedule.

#### **Program Evaluation:**

In 2018, EVgo contracted the Shared Use Mobility Center (SUMC) to conduct the program evaluation of EACH. The program evaluation will address factors such as customer awareness, community engagement, vehicles access, charging access, charging behavior, travel behavior, hub utilization and GHG/environmental impact. EVgo and SUMC continued to define key performance metrics and the research methodology. The EACH program can serve as a policy pilot as the shared economy and shared mobility continue to create trends that policy makers, community organizers and businesses are recognizing as having transformational change in neighborhoods.

#### Carshare and Rideshare Partnerships:

EVgo leadership participated at the Shared Mobility Summit in Chicago this quarter. This convening offered an opportunity to share our experience with Green Raiteros and EACH to date as well as continue to build relationships with current and potential partners to expand access to EVs for more carshare and rideshare drivers and riders. The event gathered companies, NGOs and transportation planners, to explore how different mobility options like, ride hailing, carsharing, micro mobility, mass transit, autonomous vehicles, mobility hubs, and the latest technology can work together to create a multi-modal transportation system that's affordable, efficient, accessible, and environmentally sound.

#### 2019 O2 Activities

In Q2 2019, EVgo expects that the Communities Charging for Change marketing campaign by Citizen Group to be fully in place and schedules for launching station openings, community events, and educational outreach at each specific site coordinated with stakeholders. EVgo expects all sites to finish construction with only energization as the outstanding completion hurdle. Finally, the program evaluation will begin and key performance indicators will be tailored to evaluate the EACH Project.

### Appendix A

## **Freedom Station Table**

See attached.

## APPENDIX A - Freedom Station Detail Dated as of: March 5, 2019

	Dated as of: March 5, 2019						
<u>Name</u>	Street Address	City	Region	<b>Operational</b>	<u>PUMA</u>	Both SAE & CC	CES 2.0
