The units listed in the table are defined as "facility points" within PacifiCorp's inspection system. For overhead facilities, a facility point is a pole including all equipment installed on the pole. The span of wire between poles or service drops spanning from poles to customer's facilities are associated to the nearest facility point for inspection purposes. For underground facilities a facility point is the location associated with ground mounted equipment, including all equipment at that individual location such as a padmount transformer or switch cabinet.

VERIFICATION

I am Vice President of Transmission and Distribution Operations, and am authorized to make this verification on PacifiCorp's behalf. I am informed and believe that the matters stated in the foregoing document are true.

I declare under penalty of perjury that the foregoing is true and correct.
