

COMMISSION POLICY	
Category: Strategic Directive	Title: Climate Change
Date of Adoption:	Policy Number: SD-?
Revision:	Resolution No.
	Resolution No.

The Commission will promote greenhouse gas (GHG) reductions through its decisions and leadership for the betterment of California’s residents, ecosystems, climate and economy.

The CPUC will:

1. Implement State law and develop policies that are consistent with California’s environmental sustainability goals, most notably the need to reduce GHG emissions to 40% below 1990 levels by 2030, in a safe, cost effective and timely manner, and in coordination with Federal, other State, Local, and Tribal governmental entities.
2. Consider the impact of all Commission decisions and policies on the State’s GHG emissions inventory, through quantitative and qualitative measures.
3. Work with Federal and State agencies to support inclusion of adaptation to the impacts of climate change for infrastructure and resource decisions within the State and ensure that activities by CPUC-regulated entities are so informed.
